

JOB OFFER

Position in the project:	Post-doctoral researcher
Scientific discipline:	Mass Spectrometry Cancer Vaccine Discovery Science
Job type (employment contract/stipend):	Employment
Number of job offers:	2
Remuneration/stipend amount/month ("X0 000 PLN of full remuneration cost, i.e. expected net salary at X 000 PLN"):	upon negotiations, up to max. 12 000 PLN/ month (gross)
Position starts on:	As soon as possible, upon negotiations
Maximum period of contract/stipend agreement:	2 years
Institution:	International Centre for Cancer Vaccine Science, University of Gdańsk, Poland
Project leaders:	Prof. Ted Hupp and Prof. Robin Fahraeus
Project title:	<i>International Centre for Cancer Vaccine Science</i> <i>Project is carried out within the International Research Agenda Programme of the Foundation for Polish Science</i>
Project description:	The International Centre for Cancer Vaccine Science (ICCVS) is an innovative new partnership between the University of Gdańsk and the University of Edinburgh addressing a major challenge in cancer medicine. The ICCVS based at the University of Gdańsk, supported by the Foundation for Polish Science, aims to create a world-leading research cluster in the discovery, characterization and translation of molecular mechanisms in cancer immunological science. We are now launching an international recruitment programme for exceptional scientists who wish to join a multidisciplinary centre which aims to integrate science and technology to bring together core expertise in molecular, biochemical and cell biology with proteogenomics, bioinformatics, structural biology, synthetic biology, cancer and immunology. We are particularly interested in applicants who will work within a team of post-doctoral scientists who have knowledge in the fields of antigen presentation, virology, vaccinology, cancer immunology, cell signalling or veterinary science. However, talented and enthusiastic applicants from other disciplines will be considered.
Key responsibilities include:	The ICCVS will conduct research into novel ways to kick-start the human immune system so that it is able to better target

	<p>cancer cells. The new knowledge will be useful in future clinical and industrial work on cancer vaccines and immunotherapy drugs, making oncological treatment more effective.</p>
<p>Profile of candidates/requirements:</p>	<p>The successful candidate will apply mass spectrometry based proteomics in the analysis of clinical samples with the aim to uncover peptide neoantigens that may serve as cancer vaccine targets. We are looking for exceptionally motivated candidates with a proven track record and solid knowledge and working experience with the latest generation mass spectrometry technologies.</p> <p>Candidate should have PhD in chemistry or related sciences (earned not earlier than 2013).</p> <p>Hands-on experience in tandem mass spectrometry with demonstrated experience in structure determination of the compounds</p> <p>Demonstrated experience in sample preparation and isolation of large number of metabolites</p> <p>Ambition to work in highly interdisciplinary environment. Good communication and interpersonal skills, be well organized and work within a team as well as independently.</p>
<p>Required documents:</p>	<ol style="list-style-type: none"> 1. CV 2. Motivation letter 3. Reference letter(s) from 2 former employers / supervisors.
<p>We offer:</p>	<ol style="list-style-type: none"> 1. The ICCVS is housed in brand new state-of-the-art facilities at the UG with facilities for mass spectrometry, virology, protein biochemistry and vaccine technology. 2. ICCVS researchers will have joint supervision with scientists at the University of Edinburgh, within strategic platforms for stem cell science, drug discovery, synthetic biology, computational science, structural biology, veterinary medicine, and optical imaging (www.optima-cdt.ac.uk) 3. The ICCVS provides an exceptional opportunity for motivated Post-Doctoral Scientists and PhD students to work in an international multidisciplinary training environment to tackle major challenges at the interface between basic cancer discovery science and translational medicine.

Please submit the following documents to:	iccvs@ug.edu.pl
Application deadline:	20.11.2018
For more details about the position please visit (website/webpage address):	www.iccvs.ug.edu.pl

Consenting clause

Please include in your offer: „I consent to the processing of my personal data by the University of Gdańsk contained in the application documents for the needs necessary to carry out the recruitment procedure, including the competition for the position of post-doctoral researcher. in University of Gdańsk, International Centre for Cancer Vaccine Science, in accordance with the General Data Protection Regulation of 27 April 2016.

In addition, I declare that I have been informed of the possibility of withdrawing consent at any time and that its withdrawal does not affect the legality of the processing which was carried out on the basis of consent before its withdrawal.”

Information clause

In accordance with the General Data Protection Regulation of 27 April 2016 hereinafter referred to as GDPR, we inform that:

1. The Administrator of your personal data is the University of Gdansk with headquarters in (80-309) Gdańsk, ul. Jan Bażyński 8.
2. The administrator of personal data has appointed the Data Protection Officer, which can be contacted on the phone number (58) 523 24 59 or e-mail address: poin@ug.edu.pl.
3. Your personal data will be processed in order to carry out the recruitment process for the position post-doctoral researcher. in University of Gdańsk, International Centre for Cancer Vaccine Science,
4. The legal basis for the processing of your personal data for the purposes of recruitment is art. 6 par. 1 lit. c GDPR – processing is necessary to fulfill the legal obligation incumbent on the administrator resulting in particular from art.118 a of the Law on Higher Education and art. 221 of the Act - Labor Code. A premise that legalizes the processing of personal data voluntarily provided by the candidate, going beyond the scope of data indicated in art. 221 of the Act - Labor Code will be art. 6 par. 1 lit. a GDPR - consent of the data subject.
5. Providing your personal data by yourself, after making a decision about joining the recruitment process is obligatory in the scope specified in art. 22¹ of the Labor Code and the Law on Higher Education and conditions the possibility of applying for employment and possible further employment. In the case of providing personal data going beyond the above law - providing your personal data by yourself is voluntary but it determines the possibility of participation in the recruitment process
6. Your personal data will be processed on behalf of the data controller by authorized employees only for the purposes referred to in par. 3.
7. Your personal data will be kept for the period necessary to achieve the objectives set out in paragraph. 3. In the case of a negative result of your recruitment, your data will be deleted immediately after the recruitment is completed, unless the law requires the archiving requirement within the specified scope - for the time specified in these provisions.
8. Your personal data will not be disclosed to third parties, except as provided for by law. In the case of submission of application documents by electronic means, the recipient of your data may be an entity acting on behalf of the administrator, ie an entity that is the operator of the postal service.
9. Under the rules laid down in the provisions of the GDPR, you are entitled to:
 - a. the right to access the personal data,
 - b. the right to rectify them when they are inconsistent with the real state,
 - c. the right to remove them, limit processing and transfer data - in cases provided for by law,
 - d. the right to object to data processing,
 - e. the right to lodge a complaint to the supervisory body - the President of the Office for Personal Data Protection, when you think that the processing of your personal data violates the provisions on the protection of personal data.
