Subject objectives	The aim of the master's seminar is to provide students with knowledge, skills and methodological competences that will allow them to independently formulate economic problems, research theses, hypotheses or research questions and verify them based on publications, including publications in English, and empirical data, as well as to edit the text of a master's thesis in accordance with the faculty's instructions.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[MSGMU2_U10] can accurately select and use sources of information on international economic relations, evaluate, critically analyse and creatively interpret them, and can present them in an innovative way, using advanced information and communication techniques	The student is able to appropriately select and use information sources relevant to the subject matter of the diploma thesis in the field of international economic relations, evaluate them, conduct critical analysis and creative interpretation, and present the results of the analyses in an innovative manner using advanced information and communication technologies (ICT).	[SU3] text preparation/written work [SU8] observation of student's independent or team work
[MSGMU2_W08] knows and understands the terms and principles of intellectual (industrial) property protection and copyright law; understands the necessity of intellectual property management	The student knows and understands the concepts and principles of intellectual property (industrial property) protection and copyright law.	[SW3] text preparation/written work

Subject contents

1. Formulate relevant problems in economics, consistent with the specialisation studied, which could be the subject of research in the master's thesis.
2. Formulate the aim and hypotheses, thesis or research questions of the master's thesis.
3. Selection and analysis of appropriate sources of knowledge relevant to the explanation of the problem in question, while respecting the principles of intellectual property protection.
4. Preparation of an original description and diagnosis of the subject of the study as a basis for the realisation of the aim of the thesis.
5. Development of a concept for a detailed analysis of all research aspects.
6. Preparation of development scenarios, forecasts or strategies concerning the researched problem.
7. Correct editing of the thesis text (communicativeness, scientific language of the study, bibliographic description, error control).
8. Preparation of bibliography, list of tables and figures according to the departmental template and instructions.
9. Preparation of a summary of the thesis in Polish and English.

Prerequisites and co-requisites

none

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
By the end of the first semester - at least formulating a topic and developing a plan, collecting basic sources of knowledge and preparing a draft of the first chapter.	100.0%	100.0%
