

Subject card

Subject name and code	Nature conservation - auditorium exercises, PG_00091501						
Field of study	Water Management and Protection of Water Resources						
Date of commencement of studies	October 2024	Academic year of realisation of subject				2024/2025	
Education level	undergraduate studies	Subject group				Obligatory subject group in the field of study Subject group related to scientific research in the field of study Subject group related to practical vocational preparation	
Mode of study	full-time studies	Mode of delivery				at the university	
Year of study	1	Language of instruction				Polish	
Semester of study	2	ECTS credits				1.0	
Learning profile	practical	Assessment form					
Conducting unit	Pracownia Bioróżnorodności i Funkcjonowania Bentosu -> Katedra Ekologii Morza -> Faculty of Oceanography and Geography						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Urszula Janas				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
	Additional information: learning methods: field classes, presentation, discussion, team work						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		0.0		13.0	28
Subject objectives	Familiarize students with nature conservation issues: the value of maintaining balance in aquatic ecosystems, threats and nature protection						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[GWOZWL3-U16] demonstrate creativity in working independently and in team, taking on a variety of roles, including a leadership role		He or she is able to demonstrate creativity in teamwork on nature conservation issues by taking on various roles, including a leadership role			[SU2] presentation/project/paper/report	
	[GWOZWL3-U03] observe and describe the changes taking place in water management and predict further directions of its development as well as conduct a critical analysis of: case studies of problems of water management and protection of water resources in terms of impact on ecological, social and economic systems natural valorization and assessment of quality of the environment		He or she is able to observe and describe changes in water management and conduct a critical analysis (case study of problems of water management and protection of water resources in protected areas			[SU2] presentation/project/paper/report	

Subject contents	Execution of projects, e.g. conservation plans for a selected area, a plan for social communication of issues related to nature protection. Field trip - e.g. the Vistula Lagoon and Zulawy Wislane or the coastal zone in the area of the Gulf of Gdansk		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Participation in field activities, performance of credit work and presentation	51.0%	100.0%
