

**Subject card**

Subject name and code	Aquaculture - lecture, PG_00054195						
Field of study	Marine Biotechnology						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2024/2025		
Education level	postgraduate studies	Subject group					
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	1	ECTS credits			2.0		
Learning profile	academic	Assessment form					
Conducting unit	Pracownia Akwakultury -> Katedra Biologii Morza i Biotechnologii -> Faculty of Oceanography and Geography						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Konrad Ocalewicz				
	Teachers		dr hab. inż. Konrad Ocalewicz				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		20.0	55
Subject objectives	The aim is to obtain knowledge about modern aquaculture as an example of biotechnology, the main breeding species, new strategies for sustainable food production, characterized by low CO2 emissions, and modern methods of feeding fish, taking care of their health and well-being, as well as issues of reproduction and genetics.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[MBMU2-KW01] Knows and broadly understands the value of natural marine resources		Has organized and in-depth knowledge of aquaculture, its potential and the possibility of using biotechnological solutions in it			[SW4] test/exam - oral or written [SW1] oral statement/ conversation/discussion	
	[MBMU2-KU03] Can use and critically analyze available scientific information; can prepare and present - orally or in writing - a paper covering detailed problems in the field of marine biotechnology on the basis of the scientific information or their own work, with the use of scientific language, including specialized terminology and conceptual apparatus; has the ability to conduct discussions		Is able to fluently use and critically analyze available scientific information on aquaculture; based on them and on the basis of his/her own work, he/she can prepare and present an oral presentation and/or a written study covering detailed issues in the field of aquaculture, using scientific language, including specialized terminology and conceptual framework; has the ability to conduct discussions, also in a foreign language, with various recipients			[SU1] oral statement/conversation/discussion [SU5] implementation of a problem task	
	[MBMU2-KK01] Is ready to critically evaluate his knowledge and continuously improve, update and upgrade his skills in the field of marine biotechnology		He is ready to critically evaluate his own knowledge and constantly improve it, update it and raise his qualifications in the field of marine biotechnology			[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report	

Subject contents	Aquaculture as an example of biotechnology. Milestones in the development of aquaculture. Main species raised in aquaculture. Aquaculture and the fight against hunger. Methods of breeding fish and aquatic invertebrates; from earthen ponds to recirculating aquaponic systems. Fish nutrition. Fish health and welfare - vaccinations and selection programs aimed at obtaining fish resistant to viral and bacterial diseases. Reproduction and genetics in aquaculture reproductive technologies. Selection programs in aquaculture. Production of transgenic fish, aquatic invertebrates and plants. Fish as model organisms. Conservation aquaculture. Fish processing. Aquaculture prospects and limitations. Carbon footprint generated by aquaculture challenges and trends to reduce CO2 emissions.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test 2	51.0%	50.0%
	test 1	51.0%	50.0%
