

Subject card

Subject name and code	Statistics for oceanographers - laboratory exercises, PG_00118076						
Field of study	Oceanography						
Date of commencement of studies	October 2024	Academic year of realisation of subject				2025/2026	
Education level	undergraduate studies	Subject group					
Mode of study	full-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	3	ECTS credits				2.0	
Learning profile	academic	Assessment form					
Conducting unit	Faculty of Oceanography and Geography						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Maciej Mańko				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		30.0	64
Subject objectives	The aim of the course is to develop the ability to freely use basic statistical terms and software and functions for statistical analyzes in order to describe natural phenomena; developing the ability to interpret the obtained research results; learning about the possibilities of applying statistical methods in the studied field. The methods discussed will provide students with the basis for deeper study of statistical methods as part of specialized subjects taken during their studies.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	OCEANL3-U05		Is able to use knowledge of statistics to solve tasks and complex and unusual problems in the field of oceanography by selecting and using appropriate statistical methods and specialized computer software			[SU2] presentation/project/paper/report [SU4] test/exam - oral or written	
	OCEANL3-W05		Knows basic techniques and tools at an advanced statistical level for the description of processes and phenomena occurring in the marine environment, and also for the description of the relationships between objects/facts/processes/phenomena in marine environment			[SW4] test/exam - oral or written	
	[OCEANL3-K03] is ready to exercise caution and criticism in accepting information from scientific literature, the Internet and other media relating to natural sciences		He is ready to make his own decisions about regarding the use of learned statistical methods and to critically assess the obtained results of statistical research (program content of the lecture and exercises).			[SK2] presentation/project/paper/report [SK4] test/exam - oral or written	

Subject contents	<p>1. Data organization, graphical presentation of data 2. Descriptive statistics: creation and interpretation of distribution series, multi-way tables, histograms; descriptive characteristics of empirical distributions 3. Random variables and their distributions, use of a probability calculator 4. Confidence interval for expected value and proportion; determining the minimum sample size for estimation with a given uncertainty 5. Introduction to testing statistical hypotheses: testing the normality of the distribution of variables, Student's t-tests - calculations and interpretation of results 6. Interdependence and regression analysis: Pearson's linear correlation coefficient and testing its significance, linear regression function (estimation and interpretation of function parameters, assessment of fit, testing the significance of the regression coefficient), ranking of variables and Spearman's rank correlation</p>														
Prerequisites and co-requisites															
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="454 575 794 607">Subject passing criteria</th> <th data-bbox="798 575 1137 607">Passing threshold</th> <th data-bbox="1141 575 1479 607">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="454 611 794 660">Average from grades from entry tests</td> <td data-bbox="798 611 1137 660">51.0%</td> <td data-bbox="1141 611 1479 660">20.0%</td> </tr> <tr> <td data-bbox="454 665 794 696">Average from report grades</td> <td data-bbox="798 665 1137 696">51.0%</td> <td data-bbox="1141 665 1479 696">10.0%</td> </tr> <tr> <td data-bbox="454 701 794 732">Grade from final test</td> <td data-bbox="798 701 1137 732">51.0%</td> <td data-bbox="1141 701 1479 732">70.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Average from grades from entry tests	51.0%	20.0%	Average from report grades	51.0%	10.0%	Grade from final test	51.0%	70.0%
Subject passing criteria	Passing threshold	Percentage of the final grade													
Average from grades from entry tests	51.0%	20.0%													
Average from report grades	51.0%	10.0%													
Grade from final test	51.0%	70.0%
