University of Gdańsk

Subject card

Subject name and code	Diseases of marine organisms - laboratory exercises, PG_00117732		
Field of study	Oceanography		
Date of commencement of studies	October 2024	Academic year of realisation of subject	2025/2026
Education level	postgraduate studies	Subject group	Obligatory subject group in the field of study Optional subject group
Mode of study	full-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	Polish Polish
Semester of study	3	ECTS credits	2.0
Learning profile	academic	Assessment form	
Conducting unit			
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Katarzyna Smolarz	
	Teachers		

Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	20.0	0.0	0.0	20
	E-learning hours included: 0.0						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	20	5.0	20.0	45

Subject objectives	he aim of the course is to analyze and assess the health of marine organisms living in natural conditions

Learning outcomes

Course outcome	Subject outcome	Method of verification
[OCEANMU2-W06] knows and identifies potential threats to the marine environment on a local and global scale resulting from strong anthropopressure, predicts their effects on various time and space scales	knows and identifies potential threats to the marine environment on a local and global scale resulting from strong anthropopressure, predicts their effects on the condition and well-being of marine organisms (program contents B2-B3)	[SW2] presentation/project/paper/ report
[OCEANMU2-U08] is able to prepare a study of a given issue/ problem in Polish and a selected foreign language in written form (short scientific text, documented research work) and orally (paper, presentation) and discuss with specialists on topics related to oceanographic issues, with particular emphasis on the studied specialty	is able to prepare a study of a selected issue/problem in Polish and English in written form (short scientific text, documented research work) and orally (paper, presentation) and discuss topics related to oceanographic issues in the thematic scope related to diseases of free-living marine organisms (program content B2-B4)	[SU1] oral statement/conversation/ discussion
[OCEANMU2-K05] is ready to follow the rules occupational health and safety, taking care of the entrusted person specialized and recognition equipment emergency situations and take appropriate action activities	is ready to comply with the principles of occupational health and safety, take care of the specialized equipment entrusted to him, recognize threat situations and take appropriate actions (program content: B4)	[SK1] oral statement/conversation/ discussion [SK8] observation of student's independent or team work
[OCEANMU2-U04] is ready to develop in an analytical and synthetic way research and analysis results and based on them creating conclusions	is able to analytically and synthetically develop research and analysis results and, based on them, make correct conclusions regarding the diagnosis of diseases of marine organisms (program contents B1-B4).	[SU4] test/exam - oral or written

Subject contents

1 Familiarizing the student with the safety rules used in the laboratory and preparing for group work.

2 Diagnostics of diseases and pathological changes in free-living marine organisms.

3 Anatomopathological changes (retrograde changes, inflammation, cancer, parasitic infections) and epizootics on the example of Limecola balthica mussels.

4 Basic principles of ethics in biological research, the use of literature sources and reporting.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
final report (assessed: comprehensiveness of the topic, substantive correctness, originality, form)	50.0%	25.0%
assessment of activity and work directly during classes (assessed: group work, activity)	50.0%	15.0%
knowledge of the material discussed during classes (assessed: practical use of discussed issues, association of facts)	50.0%	60.0%
