University of Gdańsk

Subject card

Subject name and code	Management of the coastal zone, PG_00117791						
Field of study	Oceanography						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	postgraduate studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit	Faculty of Oceanography and Geography						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Radosław Wróblewski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		3.0		15.0	48
Subject objectives	Knowledge of the basic processes and factors affecting shore and coastal zone development; knowledge of coastal types; human influence on coastal zone development; Integrated Coastal Zone Management strategy and mechanisms, social, economic and environmental objectives.						

Learning outcomes

Course outcome	Subject outcome	Method of verification
[OCEANMU2-W02] knows and understands complex processes and phenomena occurring in the marine environment, with particular emphasis on the coastal zone, as well as complex relationships between living and non-living elements of the aquatic environment	understands coastal and marine processes	[SW1] oral statement/ conversation/discussion
[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)	Is proficient in oceanographic issues, including marine coastal zone processes	[SW1] oral statement/ conversation/discussion
[OCEANMU2-U09] can take part in a discussion/debate using substantive arguments, has the ability to formulate opinions based on scientific knowledge and experience and creating synthetic summaries	Is able to use scientific resources.	[SU1] oral statement/conversation/ discussion
[OCEANMU2-U05] is able to use source information in Polish and a selected foreign language, including archival and electronic databases, in the field of oceanographic issues, performs critical analysis and synthesis of information	Is able to use scientific resources.	[SU1] oral statement/conversation/ discussion
[OCEANMU2-W07] knows and understands legal regulations, principles of sustainable development of the marine environment, its protection and management of the marine environment and its resources	knows the basic law on coastal zone management	[SW1] oral statement/ conversation/discussion
[OCEANMU2-W06] knows and identifies potential threats to the marine environment on a local and global scale resulting from strong anthropopressure, predicts their effects on various time and space scales	understands coastal processes	[SW1] oral statement/ conversation/discussion

Subject contents

Characterisation of processes and factors influencing coastal development. Classification of sea and ocean shores, division of the coastal zone. Human influence on coastal development, coastal zone, methods of coastal protection, rationale for coastal protection. Projections of coastal evolution in the light of global climate change, potential threats. Problems of coastal management. Social, economic and environmental goals of sustainable development. Organisation of the implementation of ICZM programmes.Coastal resources in the context of management, resource assessment. Management programmes for selected coastal areas. National and world experience in coastal area management, taking into account areas with extraordinary risks.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
written test: with open questions (tasks) or oral exam (depending on which version students choose)	51.0%	100.0%
