

**Subject card**

<b>Subject name and code</b>	Maritime Spatial Planning, PG_00119531						
<b>Field of study</b>	Economics						
<b>Date of commencement of studies</b>	October 2024	<b>Academic year of realisation of subject</b>			2025/2026		
<b>Education level</b>	Master's studies	<b>Subject group</b>			Obligatory subject group in the field of study Specialty subject group		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	2	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	3	<b>ECTS credits</b>			3.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>			credit		
<b>Conducting unit</b>							
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		prof. dr hab. Jacek Zaucha				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	15		0.0		0.0	15
<b>Subject objectives</b>	The aim of the seminar is to present to students the current state and mechanisms shaping the spatial development of maritime areas and the instruments for managing these areas, with an emphasis on maritime spatial plans.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[EKONMU2_W02] has an in-depth knowledge of various types of existing economic entities and organisations as well as an extended knowledge of public institutions	The student has in-depth knowledge of various types of existing entities and economic organizations conducting business activities in maritime areas and extended knowledge of public institutions responsible for the development of maritime areas.	[SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report [SW5] implementation of a problem task
	[EKONMU2_U06] can practically apply various forms and range of acquired knowledge in economics, finance and management, supplementing it with an independent critical analysis of its efficiency and usefulness	The student has the ability to use in practice various forms and scope of acquired knowledge in the field of economics, finance and management for maritime spatial planning, supplementing it with an independent critical analysis of their effectiveness and usefulness.	[SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report [SU5] implementation of a problem task [SU8] observation of student's independent or team work
	[EKONMU2_U05] uses (legal, professional, ethical) normative systems and can effectively solve complex economic and social problems using them	The student uses normative systems (legal, professional, ethical) and is able to use them to effectively solve complex economic and social problems regarding the spatial development of maritime areas.	[SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report [SU5] implementation of a problem task [SU8] observation of student's independent or team work
	[EKONMU2_W08] has an in-depth knowledge of processes occurring in enterprises and economic organisations and with related areas, as well as of processes of change in public institutions; knows methods of research on the regularities governing these changes, taking into account the influence of external stakeholders on them	The student has in-depth knowledge of the processes taking place in maritime areas and in the enterprises and economic organizations operating there, as well as the changes in public institutions responsible for the spatial development of maritime areas, is aware of methods of examining the regularities governing these changes, taking into account the influence of external stakeholders on them.	[SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report [SW5] implementation of a problem task
	[EKONMU2_K03] inspires and organizes preparation of economic and social projects, following the idea of sustainable development, reconciling legal, economic, ecological, political and social requirements	The student inspires and organizes the preparation of economic and social projects regarding the spatial development of maritime areas, in accordance with a paradigm of sustainable development, being able to reconcile legal, economic, ecological, political and social requirements	[SK1] oral statement/conversation/ discussion [SK2] presentation/project/paper/ report [SK5] implementation of a problem task [SK8] observation of student's independent or team work
	[EKONMU2_K05] correctly identifies, diagnoses and solves dilemmas and alternative solutions related to the profession	The student correctly identifies, diagnoses and resolves dilemmas and various variants of solutions related to the profession of a maritime spatial planner.	[SK1] oral statement/conversation/ discussion [SK2] presentation/project/paper/ report [SK5] implementation of a problem task [SK8] observation of student's independent or team work
Subject contents	<ol style="list-style-type: none"> <li>1. The essence of maritime space and the resulting consequences for maritime spatial planning.</li> <li>2. The essence of maritime spatial planning. Spatial planning of maritime areas in the world and in Poland, including cooperation in spatial planning of maritime areas in the Baltic region.</li> <li>3. EU Maritime Spatial Planning Platform and main sources of knowledge about this planning.</li> <li>4. Spatial conflicts at sea.</li> <li>5. Mechanisms shaping spatial development at sea.</li> <li>6. Spatial rent from maritime areas.</li> <li>7. Instruments for managing maritime areas.</li> <li>8. Planning cycle, types of plans, planning instruments and tools.</li> <li>9. Legal framework for maritime spatial planning (international and national legal acts).</li> <li>10. Soft law, including VASAB-HELCOM Group documents.</li> <li>11. Polish strategic documents relating to maritime spatial planning.</li> <li>12. The state of spatial development of Polish maritime areas.</li> <li>13. The process of planning the spatial development of Polish maritime areas.</li> <li>14. Existing and currently under preparation spatial development plans for Polish maritime areas.</li> <li>15. The decisions and effects of these plans on the maritime economy sectors.</li> </ol>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	group projects and student engagement during classes	51.0%	100.0%

	Resources addresses	<p>Supplementary</p> <p><a href="https://maritime-spatial-planning.ec.europa.eu/">https://maritime-spatial-planning.ec.europa.eu/</a> - The European MSP Platform is an information and communication gateway designed to offer support to all EU Member States in their efforts to implement Maritime Spatial Planning (MSP) in the years to come. With the adoption of the EU Directive on Maritime Spatial Planning (2014/89/EU), all coastal EU Member States are required to prepare cross-sectoral maritime spatial plans by 2021. Funded by the EU Directorate General for Maritime Affairs and Fisheries (DG MARE), the European MSP Platform acts as the central exchange forum for the rich knowledge generated in past, current and upcoming MSP processes and projects. This will allow officials, planners and other stakeholders interested in MSP to build on what is already available, avoid duplication of efforts, assist in capacity building and foster development of new practice.</p>
Example issues/ example questions/ tasks being completed	<p>The seminar will also include specific case studies (their economic and spatial dimensions), in which students will solve real problems regarding conflicts in the spatial development of Polish maritime areas. The practical effect of the seminar will be to equip students with the ability to read Polish maritime plans, analyze the effects of their decisions and submit suggestions regarding the need to change these plans. Economic instruments and programs for the management of marine areas will also be presented, including international (conventions, EU directives) and national legal acts underlying them and regulating maritime spatial planning. Students will gain knowledge about economic models for the development of these areas, the interaction of market decisions and the sphere of public choice, in particular regulatory activities undertaken by the maritime administration, with particular emphasis on existing and currently under preparation spatial development plans for Polish maritime areas, as well as the rights of coastal countries to manage space. marine areas under their jurisdiction.</p>
