

**Subject card**

<b>Subject name and code</b>	Instruments for Economic Research, PG_00102055						
<b>Field of study</b>	International Economic Relations						
<b>Date of commencement of studies</b>	October 2024	<b>Academic year of realisation of subject</b>			2024/2025		
<b>Education level</b>	postgraduate studies	<b>Subject group</b>			Obligatory subject group in the field of study		
<b>Mode of study</b>	part-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	1	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	2	<b>ECTS credits</b>			1.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>					
<b>Conducting unit</b>	Katedra Makroekonomii -> Faculty of Economics						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr hab. Wojciech Bizon				
	<b>Teachers</b>		dr hab. Wojciech Bizon				
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	10.0	0.0	0.0	0.0	0.0	10
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	10		0.0		0.0	10
<b>Subject objectives</b>	The purpose of the course is to provide students with the necessary knowledge and skills in the use of available tools in conducting economic research necessary in the development of thesis work, as well as to familiarize them with the possibilities of using Statistica and Excel in advanced data analysis.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[MSGMU2_U09] can innovatively solve problems in the field of international economic relations and the functioning of economic entities on the international market, adapting existing or developing new methods and tools	is able to solve problems in the area of international economic relations using approaches typical for economic research	[SU5] implementation of a problem task
	[MSGMU2_U02] can observe, evaluate and critically analyse the causes and course of processes and phenomena taking place in the open economy; can formulate his/her own opinions on the subject, interpret statistical data and economic indicators necessary in this respect, and also forecast economic processes and phenomena using advanced methods and tools applied in economic sciences	knows how to use economic research tools in describing economic reality	[SU5] implementation of a problem task
	[MSGMU2_K01] is ready to recognise the importance of knowledge of economics in the process of identifying and solving problems in the area of international economic relations and to consult experts in case of difficulties in solving them independently	understands the importance of knowledge in economics	[SK4] test/exam - oral or written
	[MSGMU2_K02] is ready to critically assess the level of acquired knowledge, skills and professional competence in the area of international economic relations	Is aware of the vastness of available knowledge and their own shortcomings	[SK4] test/exam - oral or written
	[MSGMU2_W13] knows and understands methods and tools for describing economic phenomena, including data acquisition techniques, which make it possible to describe and analyse economic entities functioning on the international market as well as processes and phenomena occurring in them and between them, and also those supporting decision-making processes	knows and understands the most important methods and tools for describing economic phenomena	[SW4] test/exam - oral or written
	[MSGMU2_K06] is ready to independently identify, diagnose and responsibly resolve dilemmas and alternative solutions related to his/her profession and the development of professional achievements	is familiar with variant analysis	[SK5] implementation of a problem task
	[MSGMU2_U01] can creatively interpret and explain complex and atypical economic phenomena and the relations occurring between them, using the acquired knowledge in economics, finance and international economic relations	can interpret and explain unusual economic phenomena	[SU4] test/exam - oral or written
	[MSGMU2_U14] has a thorough ability to prepare specialist oral presentations on economic and social issues, using specialist theoretical approaches, the principles of collecting data from various sources, their description and interpretation, and drawing conclusions on the basis of scientific literature; can prepare and lead a debate	Knows how to use statistical material to prepare presentations	[SU6] demonstration of practical skills

	Course outcome	Subject outcome	Method of verification
	[MSGMU2_U11] independently formulates and tests hypotheses related to simple research problems, appropriately selects and applies methods and tools, including statistical tools and data acquisition techniques in order to verify hypotheses and diagnose economic processes, and on this basis to take appropriate economic decisions	independently formulates statistical hypotheses	[SU4] test/exam - oral or written
	[MSGMU2_U13] has a thorough ability to prepare specialist written work on economic and social issues, using specialist theoretical and methodological approaches, collecting data from various sources, their description and interpretation, the principles of hypothesis formulation and drawing conclusions on the basis of scientific literature and factual data, and can perform advanced international comparisons	Is able to incorporate quantitative parts into the reports and discussions being developed	[SU6] demonstration of practical skills
	[MSGMU2_U10] can accurately select and use sources of information on international economic relations, evaluate, critically analyse and creatively interpret them, and can present them in an innovative way, using advanced information and communication techniques	knows how to analyze statistical and numerical information contained in works on international economic relations	[SU4] test/exam - oral or written
	[MSGMU2_U06] can identify types of risks related to international operations of enterprises and correctly determine their consequences and methods of mitigation, with a skilful application of theory, using appropriate research method	understands the issue of risk in economic research	[SU5] implementation of a problem task
Subject contents	<p>Research plan. Research objective and hypotheses. Design of the economic study. Data and their sources. Qualitative and quantitative research. Qualitative research in practice. Observation. Individual interviewing. Group interviews (focus groups). Experiment. (lecture 2 h) Quantitative research in economic practice. Concept and properties of normal distribution. Other distributions of variables. Statistical hypotheses and their verification. Statistical significance. Statistical tests. Generalization of results. (lecture 2 h + computer lab 2 h) Data analysis support tools - STATISTICA (data analysis software system). StatSoft, Inc.: presentation of Statistica program as a tool to support analysis of macroeconomic and microeconomic data. Perform tasks using statistical methods, perform analysis using Excel. (computer laboratory 2 h) Analysis of interdependence of economic phenomena. Use of knowledge of correlation and regression in economy and enterprise. Scatter plot. Pearson's and Spearman's correlation coefficients. The explanatory and explanatory variable. Regression function. (Lecture 2 h + computer lab 2 h) Evaluating the effectiveness of changes in economic parameters. Comparisons against groups. Tests for independent and dependent samples. (lecture 2 h + computer laboratory 2 h) Search for similar economic arrangements and market segmentation. Cluster analysis - multivariate clustering of objects. Spatial variation of economic variables. Methods of optimal allocation. The k-means method. (lecture 2 h + computer lab 2 h) Creation of valuable research questionnaires. Reliability and item analysis. Cronbach's alpha. Elements of factor analysis. Bartlett and KMO tests. Shape of questions in a questionnaire. (lecture 4 h + computer lab 4h)</p>		
Prerequisites and co-requisites	Basics of descriptive statistics		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	exam	50.01%	100.0%
