	eResources addresses	Adresy na platformie eNauczanie:
Example issues/ example questions/ tasks being completed	On December 16th, the Polish company XYZ purchased new machinery from a Portuguese company valued at 250,000 EUR on 3-month credit terms. On that day, at a certain point, the dealer from ING bank quotes the spot rate to clients in the same category as company XYZ as: 1 EUR = 4.1705 - 25 PLN, and the forward rate for a 3-month transaction as: 1 EUR = 4.2326 - 58 PLN. How would you assess the relative effectiveness of XYZ company's hedge on that day using a forward transaction, if on March 16th of the following year, at a certain point, the dealer from the same bank quotes the spot rate for the same transaction amount to the same category client as XYZ as: 1 EUR = 4.2390 - 35 PLN?
