

Subject card

Subject name and code	Logistics, PG_00119405						
Field of study	International Economic Relations						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	5	ECTS credits			2.0		
Learning profile	academic	Assessment form					
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Janusz Dąbrowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		0.0		0.0	15
Subject objectives	Introducing students to logistics as a concept of flow management based on a systemic approach with particular emphasis on enterprise logistics.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[MSGL3_W13] has a well-structured knowledge of the functioning of business entities in the national and international environment, with particular emphasis on the European Union		The student understands the essence of logistics, defines basic logistics concepts, describes the types of logistics subsystems, knows methods of analyzing logistics systems, identifies various types of logistics structures in enterprises, characterizes the subject and tasks of supply, production and distribution logistics in enterprises, is able to characterize the service packages provided by different types of logistics operators. The student discusses selected issues from the lecture with the lecturer during consultations.			[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion	
	[MSGL3_U04] uses the acquired theoretical knowledge in economics to analyse and evaluate the operation of economic entities on the international market, with particular emphasis on the European Union market		The student uses his knowledge to analyze the logistics market, assess the functioning of logistics operators, and is able to apply various methods of analyzing logistics systems.			[SU1] oral statement/conversation/discussion	
	[MSGL3_K02] critically assesses the level of his/her knowledge in the field of economics; is willing to deepen and update this knowledge throughout his/her life		The student knows the limitations of his or her own knowledge and the need to constantly improve it, and is critical in expressing opinions.			[SK4] test/exam - oral or written	

Subject contents	<p>The essence and subject of logistics (concept and definitions of logistics, genesis and development of logistics, logistics infrastructure, scope of logistics activities)</p> <p>Logistics systems (concept and types of logistics systems, supply chains logistics, analysis of logistics systems, organization of logistics in enterprises)</p> <p>Supply logistics (concept and tasks of supply, logistic concept of supply, purchasing process)</p> <p>Production logistics (types of production processes, logistics processes in production, organizational types of production and production logistics)</p> <p>Distribution logistics (logistic customer service, logistic distribution channels, logistic functions of warehouses)</p> <p>Logistics costs (concept of logistics costs, structural sections of logistics costs, types of costs used in the decision-making process, concept, types, costs and methods of inventory management)</p> <p>Logistics services (concept, features and types of logistics services, origins of logistics services, external logistics providers, logistics centers, European logistics services market)</p>								
Prerequisites and co-requisites
