

**Subject card**

<b>Subject name and code</b>	Coastal zone dynamics, PG_00135503						
<b>Field of study</b>	Physical geography and geoinformation						
<b>Date of commencement of studies</b>	October 2024	<b>Academic year of realisation of subject</b>			2024/2025		
<b>Education level</b>	postgraduate studies	<b>Subject group</b>			Obligatory subject group in the field of study		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	1	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	2	<b>ECTS credits</b>			2.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>					
<b>Conducting unit</b>	Pracownia Rekonstrukcji Geomorfologicznych -> Katedra Geomorfologii i Geologii Czwororzędu -> Faculty of Oceanography and Geography						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr Patryk Sitkiewicz				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	15		15.0		30.0	60
<b>Subject objectives</b>	<ol style="list-style-type: none"> <li>1. Presentation of the hydrodynamic and geological conditions of the variability of the coastal zone</li> <li>2. Familiarization with geomorphological processes occurring in the coastal zone</li> <li>3. Determining the role of human activity in shaping the dynamics of the coastal zone</li> <li>4. Presentation of natural hazards occurring in the coastal zone</li> </ol>						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GFGMU2_W01] the specificity of Earth sciences in the field of physical geography, its internal structure, research subject and main research directions, conceptual apparatus, as well as practical applications of scientific achievements	Knows and understands the subject of research, the main research directions, the conceptual apparatus of coastal geomorphology, and the practical applications of scientific research in this field.	[SW4] test/exam - oral or written
	[GFGMU2_U05] integrate knowledge from the discipline of Earth and environmental sciences, explaining and interpreting the interrelationships between environmental processes and phenomena in order to solve research problems in physical geography and geoinformation	Can integrate knowledge in the field of coastal sciences, correctly explaining and interpreting the mutual relations between processes and phenomena occurring in the coastal zone of seas and oceans.	[SU4] test/exam - oral or written
	[GFGMU2_U02] precisely and appropriately use terminology in the field of physical geography and geoinformation in oral statements and written works	Can fluently and appropriately use terminology related to processes and forms occurring in the coastal zone in written work.	[SU4] test/exam - oral or written
	[GFGMU2_U03] effectively use selected scientific literature in the field of physical geography and geoinformation, both in Polish and English	Can effectively use scientific literature in research on the coastal zone of seas and oceans, both in Polish and English.	[SU4] test/exam - oral or written
	[GFGMU2_W03] advanced issues in the theory of geographic information systems, basics of organization and operation of spatial information infrastructures and possibilities of using geoinformatics tools in physical geography	Knows how geographic information systems are used in coastal research.	[SW4] test/exam - oral or written
	[GFGMU2_W08] the most important contemporary problems on a regional and global scale, their essence, genesis and possible consequences	Knows and understands the processes occurring in the coastal zone of seas and oceans at various spatial scales, as well as their essence, genesis, and possible consequences.	[SW4] test/exam - oral or written
[GFGMU2_K01] critical assessment of knowledge in the field of Earth and environmental sciences and geoinformation, its completion and verification through critical analysis of scientific literature	The student is ready to critically assess his knowledge of coastal geomorphology, supplement it, and verify it by critically reading the literature on the subject.	[SK4] test/exam - oral or written	
Subject contents	<ol style="list-style-type: none"> <li>1. Coastal zone basic definitions, boundaries, and internal divisions</li> <li>2. Time-spatial scales of coastal zone morphodynamics</li> <li>3. Basics of hydrodynamics</li> <li>4. Landforms of shore and seabed</li> <li>5. Methods for assessing the state and changes in shore and nearshore seabed</li> <li>6. Coastal protection methods</li> <li>7. Human impact on the coastal zone dynamics</li> <li>8. Basics of Integrated Coastal Zone Management</li> </ol>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	examination	50.0%	100.0%
