

Subject card

Subject name and code	Chemical business design, PG_00080785						
Field of study	Chemical Business						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish Polish		
Semester of study	5	ECTS credits			2.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Laboratory of Photocatalysis -> Department of Environmental Technology -> Faculty of Chemistry -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Anna Gołąbiewska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		15.0	50
Subject objectives	<ul style="list-style-type: none"> Acquainting with the principles of designing of small production enterprises; Acquainting with with the elements of process design Acquainting with the principles of economical analysis / determining the profitability of a new production installation 						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BCHINŻ_W07] Describes the construction and operating principles of basic scientific, technological and control-measuring apparatus.	Correctly presents the technological diagram of the selected process	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
	[BCHINŻ_W05] Describes the life cycle of devices, facilities and technical systems as well as modern environment-friendly technical solutions.	It proposes modern, pro-environmental technical solutions	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
	[BCHINŻ_U06] Proposes and makes simple devices, operations or unit processes related to the implementation of the technological process used in the chemical industry, taking into account material and energy balances.	Prepares a process design: chemical and technological concept	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[BCHINŻ_U07] Performs a preliminary economic analysis of designed and implemented engineering tasks.	Przygotowuje biznes plan przedsiębiorstwa Identyfikuje i rozpoznaje potrzeby rynku Projektuje małe instalacje produkcyjne oraz określa ich rentowność	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[BCHINŻ_U01] On the basis of the acquired knowledge, identifies, analyses and solves engineering tasks and problems in broadly understood chemistry.	Prepares a process design: chemical and technological concept	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written [SU5] implementation of a problem task
	[BCHINŻ_K05] Is convinced of the importance of behaving in a professional manner in every situation, taking full responsibility in the field of engineering activities and their impact on the natural environment and compliance with the principles of professional ethics.	Evaluates the technology readiness level The ability to choose a chemical and technological concept	[SK2] presentation/project/paper/report [SK4] test/exam - oral or written [SK5] implementation of a problem task
	[BCHINŻ_W09] Describes the principles of creating and developing forms of individual entrepreneurship using knowledge of economics.	Prepares the business plan for the small company	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
	[BCHINŻ_U09] Using the acquired knowledge, skills and various sources of scientific information independently prepares written papers and oral presentations.	Distinguishes the patentability of products/ technologies	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
Subject contents	<ul style="list-style-type: none"> • Teamwork, team management, strategic decisions, risk management. • Designing an enterprise organization - a practical exercise. • Patents and licenses (methods of preparing patent claims, patent search, patent purity, preparation of applications in Poland and worldwide). • Global directions in production methods and technical solutions. • Characteristics of the selected method. Characteristics of raw materials, main product, side products and waste/sewage along with a discussion of their disposal/management • Schematic diagram of the selected technology • Material balance of the selected technological process. • Energy balance of the technological process • Analysis of the energy balance of a selected process unit • Technological Diagram. Construction materials. List of cameras and devices. • Corrosion issues and material selection. Process quality control. Measurement and automation. Sewage, waste and gases. Security issues. Summary of the chemistry part. • Operational plan practical exercise. • Marketing plan practical exercise. • Financial plan practical exercise. • Effectiveness of the project and justification of its advisability - practical exercise.
