

Subject card

Subject name and code	Practical paleoecology - Field Exercises, PG_00139855						
Field of study	Archaeology						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2026/2027		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish Polish		
Semester of study	6	ECTS credits			1.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Institute of Archaeology -> Faculty of History -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Joanna Świąta-Musznicka				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		2.0		10.0	27
Subject objectives	To provide knowledge on research methods for reconstructing changes in the natural environment in the past, including bio-indicative methods used in the context of settlement studies. To provide knowledge on climate and vegetation changes in the Quaternary period (characterisation of the natural environment at the end of the last glaciation and in the Holocene and the role of settlement). To provide knowledge about the history of human use of plants in the past. To develop knowledge of the conditions for effective cooperation with natural scientists at archaeological sites.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[ARCHL3_U07] Is able to cooperate with other people as part of team work (also of an interdisciplinary nature) both at the stage of fieldwork and development of results		Be able to undertake teamwork in collaboration with palaeoecologists and archaeobotanists.		[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report [SU6] demonstration of practical skills		
	[ARCHL3_W06] Knows and understands at an advanced level the most important theories, research methods and tools of the archaeology workshop		Is aware of the research methods and tools of the workshop of the palaeoecologist and archaeobotanist and their use in archaeological site work. Has knowledge of climate and its changes and knows the history of human use of plants.		[SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report		
	[ARCHL3_K02] Is ready to recognize the importance of knowledge in solving cognitive and practical problems and to consult experts in case of difficulties in solving the problem on his own in aspect of office analyses and field work		It is ready to recognise the expertise of palaeoecologists and archaeobotanists and to seek expert advice when planning research and answering questions about botanical materials.		[SK2] presentation/project/paper/report [SK5] implementation of a problem task		

Subject contents	<p>Site selection for palaeoecological studies. Assessment of the preservation status of a biogenic reservoir and its surroundings. Collection of material for palaeoecological and archaeobotanical studies. Description of sediments in the field (Troels-Smith method). Positive and negative effects of human impact on the environment. Planning cooperation between archaeologist and palaeoecologists and archaeobotanists.</p>		
Prerequisites and co-requisites	<p>Credit for courses: Elements of Earth Sciences in Archaeology, Paleoecology with elements of archaeobotany. Knowledge of natural sciences at high school level, knowledge of Quaternary stratigraphy, knowledge of the most important methods of absolute dating.</p>		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	report	51.0%	50.0%
	report	51.0%	50.0%
