University of Gdańsk

Subject card

Subject name and code	Molecular plant physiology, PG_00147015						
Field of study	Genetics and Experimental Biology						
Date of commencement of studies	October 2024		Academic year of realisation of subject	2025/2026			
Education level	undergraduate studies		Subject group	Obligatory subject group in the field of study			
Mode of study	full-time studies		Mode of delivery	at the university			
Year of study	2		Language of instruction	Polish polish			
Semester of study	3		ECTS credits	2.0			
Learning profile	academic		Assessment form				
Conducting unit	Katedra Biologii Eksperymentalnej i Biotechnologii Roślin -> Faculty of Biology						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Wojciech Pokora					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Additional information: multimedia-based lecture						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	30	5.0	15.0	50
Subject objectives	To familiarize students with the current state of knowledge and the latest trends in plant molecular physiology and their relationship with other natural disciplines. Preparing students to conduct basic research in the field of molecular physiology of plants.				

Learning outcomes

Course outcome	Subject outcome	Method of verification
[GBEL3_W04] applied knowledge in microbiology and plant biotechnology.	Graduate has basic knowledge of plant molecular physiology	[SW4] test/exam - oral or written
[GBEL3_U01] Independently perform practical tasks in the field of biological sciences and related disciplines, formulate research problems, analyze their results, and draw conclusions.	Absolwent umie formułować problemy badawcze i analizować wyniki doświadczeń z fizjologii roślin	[SU1] oral statement/conversation/ discussion
[GBEL3_W06] the development and current state of knowledge, as well as the latest trends in molecular genetics and related fields; indicating their relationship with other disciplines in the natural or medical sciences and the possibilities of their practical application.	The graduate is aware of the development and current state of knowledge as well as the latest trends plant physiology	[SW4] test/exam - oral or written
[GBEL3_W01] Understanding the structure and properties of basic types of biological macromolecules, molecular mechanisms of metabolic pathways and genetic information flow, as well as sources of genetic variability in organisms and mechanisms of evolution; explaining the rules of inheritance, elucidating differences in the structure and functioning of prokaryotic and eukaryotic cells, and understanding the structure and functional relationships at the cellular and tissue levels.	Graduate describes the structure and properties of basic types of macromolecules biological, molecular mechanisms of basic metabolism pathways and information flow in plant cells	[SW4] test/exam - oral or written

Subject contents

Functioning of organelles characteristic of a plant cell. Molecular aspects of the photosynthesis process. Respiration and photorespiration. Uptake and transport of water and minerals in the plant body. Plant hormone synthesis - perception and transduction of hormonal signals. Regulation of physiological processes at the level of protein transcription and translation. Signaling in a plant cell. Basics of plant cells' response to stress. Plant circadian and cellular cycles. Induction and regulation of plant flowering. Plant aging and death.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Written exam	51.0%	100.0%

Recommended reading
