

Subject card

Subject name and code	Development of Insurance Product, PG_00148173						
Field of study	Insurance - Interdisciplinary Studies						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2025/2026		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	part-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			0.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Department of Statistics -> Faculty of Management -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Ewa Wycinka				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	10.0	0.0	0.0	0.0	10
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	10		5.0		20.0	35
Subject objectives	<p>The student will acquire knowledge of insurance products and the differences between them (in life and nonlife insurance).</p> <p>He/she will learn the process and principles of designing insurance products for individual, group, corporate and other clients (other organisations).</p> <p>He/she will learn the principles of insurance product development (making technical plans, calculating premiums, making profitability tests) and management principles (using basic insurance characteristics and indicators).</p>						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[UBEZMU2_U01] The student has in-depth skills of observation and interpretation of phenomena related to economic and legal aspects of insurance, including the use of advanced information and communication techniques, and is able to integrate knowledge from various scientific disciplines.	The student will be able to design and construct insurance products. He/she will be able to discuss and prepare a technical plan, check profitability (profit test) in the field of non-life insurance.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[UBEZMU2_W08] The student knows the methods and tools, including data and information acquisition techniques, appropriate to the field of insurance and related disciplines.	The student knows the principles of insurance product development, knows the stages of product development.	[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report
	[UBEZMU2_K01] The student is critically aware of the level of his knowledge and skills, recognizes the importance of knowledge in solving cognitive and practical problems in the field of insurance, consults experts in case of difficulties in solving the problem independently.	The student knows his/her knowledge and understands the need for continuous learning and acquiring new knowledge, tries to supplement and improve his/her knowledge and skills.	[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report
	[UBEZMU2_W05] The student knows and understands the dilemmas of modern insurance on scientific and practical grounds.	Discuss the international insurance market and the relationship between market participants	[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion
	[UBEZMU2_K03] The student thinks creatively, is able to go beyond the usual patterns, is able to think and act in an entrepreneurial manner, is able to adapt flexibly to the requirements of the environment.	Can creatively solve basic problems in the design of an insurance product	[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report [SK4] test/exam - oral or written
	[UBEZMU2_W02] The student has advanced and structured knowledge of various types of structures and institutions and the changes taking place in them, especially the insurance and financial system of market and public character. The student has known the interrelationships between these structures and institutions on a national and international scale.	Be able to list the organisations and players in the insurance market and discuss their role and importance.	[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion
	[UBEZMU2_U03] The student has developed skills to understand and analyze socio-economic phenomena, including by formulating and testing hypotheses related to insurance research problems.	Can estimate insurance premiums for homogeneous insurance products.	[SU1] oral statement/conversation/discussion [SU4] test/exam - oral or written
	[UBEZMU2_W01] The student has an expanded knowledge of insurance and its place in the system of sciences of economics and finance and legal sciences and its relationship to other sciences.	Understand the concept of an insurance product and its complexity.	[SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report
	[UBEZMU2_W07] The student has a structured knowledge of the principles and norms applicable to the procedures related to the application of insurance law and understands the necessity of ethical conduct in matters related to insurance and insurance law.	Understand and discuss the legal requirements for the design of insurance products.	[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report
