

Subject card

Subject name and code	Logistics support of regions and cities, PG_00150525						
Field of study	Socio-economic geography with elements of GIS						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2025/2026		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study Humanistic-social subject group		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		3.0		
Learning profile	academic		Assessment form		exam		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Grażyna Chaberek-Kałużniak				
	Teachers		dr Grażyna Chaberek-Kałużniak				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		30.0		25.0	85
Subject objectives	Familiarisation with the basic needs for logistical services in cities, in the surroundings of major agglomerations and in rural areas. Familiarisation with the concept and socio-economic functions of cities and regions. To become familiar with the requirements for the realisation of the city's and region's functions (own tasks of communes, districts and voivodeships) depending on the available logistical infrastructure resources.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GSEMU2_U05] formulate and test hypotheses regarding determinants and factors (natural, social, economic, cultural) of processes occurring in socio-economic space	Explains the influence of social, economic and environmental factors on the logistical service capacity of residents and businesses in a given area, with particular reference to the specificity of these factors in urban areas	[SU2] presentation/project/paper/report [SU5] implementation of a problem task [SU6] demonstration of practical skills
	[GSEMU2_W01] in-depth modern socio-economic processes as well as ordered and theoretically founded knowledge of socio-economic geography in connection with related natural and social scientific disciplines	Explains the relationship between local conditions and economic processes in the area	[SW2] presentation/project/paper/report [SW5] implementation of a problem task
	[GSEMU2_U01] formulate and solve complex and unusual problems of socio-economic geography and propose their innovative solutions taking into account the unpredictability of spatial processes	Proposes solutions for the logistical handling of residents or businesses in problematic situations in the area in accordance with the latest European and global trends	[SU2] presentation/project/paper/report [SU5] implementation of a problem task [SU6] demonstration of practical skills
	[GSEMU2_K01] critically assess knowledge and received content in the field of socio-economic geography and Geographic Information Systems	Analyses and evaluates the state of the logistics infrastructure in a given area in terms of its ability to serve residents and businesses in accordance with the latest demands of sustainable development	[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report [SK5] implementation of a problem task [SK6] demonstration of practical skills
	[GSEMU2_W07] basic principles for creating and developing forms of individual entrepreneurship, consistent with the principles of professional ethics, using knowledge of socio-economic geography	Explains the importance of logistics support systems in running forms of business including the importance of logistics in creating and developing individual entrepreneurship	[SW2] presentation/project/paper/report
[GSEMU2_W05] the latest development trends in the field of socio-economic geography	Interprets and explains the latest trends and solutions in logistics services for residents and businesses in urban areas and outside agglomerations	[SW2] presentation/project/paper/report [SW5] implementation of a problem task	
Subject contents	A1. Concept and functions of cities and regions A2. Needs and current conditions for logistical support of cities and regions A3. Logistics support system of cities and regions and its components A4. Solutions and trends in logistical support of cities and regions Exercise topics: B1. Functions of cities and regions B2. Identification of logistical support system components		
Prerequisites and co-requisites	knowledge of general concepts relating to regions and cities; knowledge of basic economic issues		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Final draft	51.0%	100.0%

Example issues/ example questions/ tasks being completed	Credit project; The work should be prepared individually; Executed entirely in GIS software (QGIS or ARCGIS Pro); Delivered as an A4 layout horizontal PDF. The layout should include: Title; Frame with information: author's name, index number, type, major and year of study; Map(s) and description (description of the problem and criteria considered). Topics for credit projects (one to be chosen): Location of a logistics service point including up to 3 criteria; Location of linear logistic infrastructure, including max. 3 criteria; Proposal of transport enhancement (including max 3 criteria) Evaluation criteria for the credit work: Timeliness of submission - 2pkt; Selection and explanation of criteria 3x 2pkt each = 6pkt; General workmanship - maps, completeness of map elements, colouring, aesthetics, legibility, reception of work - 2pkt; A total of 10pkt.
