

Subject card

Subject name and code	Copy Hygiene and Voice Emission, PG_00150645						
Field of study	Logopedics						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2025/2026		
Education level		Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to practical vocational preparation		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			2.0		
Learning profile	practical	Assessment form					
Conducting unit	Instytut Logopedii -> Faculty of Languages						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Grzegorz Kołodziej				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	20.0	0.0	0.0	0.0	20
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		2.0		28.0	50
Subject objectives	The student arranges basic knowledge of the humanities, social and medical sciences relevant to the direction of speech therapy, oriented to practical application in voice emission. It expands knowledge about communication competence realized with the conscious use of voice as a communication tool.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[LOGJ5_U01] Able to distinguish methodological orientations in scientific research, search, analyze, evaluate, select and integrate information in the field of linguistics (including speech therapy) using various sources, selection and application of appropriate methods and tools, including advanced information and communication technologies (ICT) in order to formulate critical judgments on this basis, solve complex problems and carry out tasks in an innovative manner.	Is able to properly identify problems of speech therapy diagnosis in the field of voice and take appropriate therapeutic and preventive actions using hygiene and voice emission	[SU1] oral statement/conversation/discussion [SU5] implementation of a problem task [SU6] demonstration of practical skills
	[LOGJ5_U04] Can independently diagnose speech development disorders, language problems, speech disorders, literacy disorders and intake difficulties, indicate their etiology and program preventive measures and speech therapy according to the disorder, including in the case of complex medical disorders, including neurological disorders.	Based on the literature, he is able to plan the course of therapy and select appropriate teaching aids	[SU1] oral statement/conversation/discussion [SU5] implementation of a problem task [SU6] demonstration of practical skills
	[LOGJ5_W01] Has a structured, in-depth and extended knowledge and knows at an extended level the terminology of linguistics and speech therapy (including selected terminology in a foreign modern language).	Has structured, in-depth and extended knowledge and knows the terminology related to voice emission at an advanced level	[SW1] oral statement/conversation/discussion [SW5] implementation of a problem task
	[LOGJ5_K01] He is ready to critically evaluate his linguistic (including speech therapy) knowledge and modify and supplement it, as well as improve his professional skills; he is ready to formulate moral problems and ethical dilemmas related to his own and others' therapeutic work.	Understands the need to expand knowledge and professional development in the field of voice emission in the context of therapeutic work	[SK1] oral statement/conversation/discussion [SK5] implementation of a problem task [SK6] demonstration of practical skills
	[LOGJ5_U05] Can independently program measures to prevent speech and language and voice disorders for people at risk of developing them.	Is able to diagnose disorders, indicate their etiology and program preventive measures and speech therapy appropriate to a given disorder in the context of voice emission.	[SU1] oral statement/conversation/discussion [SU5] implementation of a problem task [SU6] demonstration of practical skills
	[LOGJ5_W09] He knows and understands the principles of linguistic communication of adults using voice in professional work, has in-depth knowledge of the disorders noted in this group, their diagnosis and therapy.	Has organized, deepened and extended knowledge in the field of working on correct breathing and voice (the student has theoretical and practical knowledge in the field of using correct breathing and phonation) - in the light of linguistic communication disorders of different etiology in adults	[SW1] oral statement/conversation/discussion [SW5] implementation of a problem task
	[LOGJ5_W03] He knows the principles of speech therapy prevention and stimulation of normal speech and language development, as well as the theoretical basis of intervention activities for individuals and social groups in the scope necessary for the direction of speech therapy. He has knowledge of linguistics and speech therapy that allows him to independently program activities aimed at preventing speech disorders in individuals at risk of developing them.	Has the knowledge to independently diagnose speech disorders (has knowledge to assess the degree of correctness of other people's breathing and voice skills)	[SW1] oral statement/conversation/discussion [SW5] implementation of a problem task
Subject contents	Exercises to improve joint motor skills (jaws, lips, tongue, soft palate). Breathing exercises (dynamic breathing, abdominal tract, exhalation and strengthening of exhalation). Voice exercises (soft attack, resonators start).		
Prerequisites and co-requisites			

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	active participation in exercises	51.0%	60.0%
	participation in problem discussion	51.0%	40.0%
