Subject objectives	As part of their professional internship, students undergo the most comprehensive training possible in the field of functioning of selected institutions related to art and culture, enabling them to gain professional experience through real work in selected departments or on selected projects. They learn about the structure of these institutions' activities, from familiarising themselves with the administrative system, to the process and dynamics of conceptual and expert work carried out by specialist staff. The practical experience gained during the internship is intended to introduce students to the professional environment in the broadly understood world of art and culture. Students learn about the methods and tools used in the culture and arts sector. They gain in-depth knowledge of task performance methodologies, standards, procedures and good practices used in work organisation.
