

Subject card

Subject name and code	Methods supporting Rehabilitation of Patients with Neurological Damage - lecture II, PG_00151552						
Field of study	Logopedics						
Date of commencement of studies	October 2024	Academic year of realisation of subject			2025/2026		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Subject group related to practical vocational preparation		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			1.0		
Learning profile	practical	Assessment form			credit		
Conducting unit	Institute of Logopaedics -> Faculty of Languages -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr n. med. Joanna Jabłońska-Brudło				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	Presentation of complex rehabilitation and selected therapeutic methods in the context of neurological damage.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[LOGMU2_W10] He knows and understands the problems of food intake disorders of different etiology and course in patients of different ages, the principles of diagnosis and therapy of dysphagia.	Understands the communication problems and intake difficulties of patients with neurological damage.	[SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report
	[LOGMU2_K06] Able to independently and critically supplement knowledge and skills in medicine and social sciences.	is able to formulate its own opinions	[SK1] oral statement/conversation/ discussion [SK2] presentation/project/paper/ report
	[LOGMU2_U02] Independently plans and implements original and innovative linguistic projects, in line with the development trends of linguistics and speech therapy and related to the selected sphere of speech therapy activity.	independently devises and strives to implement innovative speech therapy projects, is able to communicate with specialists in the field of speech therapy activities and non-specialists in Polish and a foreign language	[SU2] presentation/project/paper/ report
	[LOGMU2_K04] He is aware of his own limitations and knows when there is a need to turn to experts in fields relevant to speech therapy.	knows when there is a need to turn to experts of the fields that cooperate with speech therapy	[SK1] oral statement/conversation/ discussion [SK2] presentation/project/paper/ report
	[LOGMU2_U06] He has in-depth skills in identifying the biomedical and psychological determinants of language problems and dysphagia in the patient, and can analyze and interpret information gathered from medical and psychological sources.	Can combine and evaluate information using a variety of sources	[SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report
	[LOGMU2_W04] Has an in-depth, structured knowledge of linguistic development in norm and pathology and the factors affecting its course.	Has an in-depth knowledge of the recipients of speech therapy activities, evaluation of the quality of speech therapy activities	[SW2] presentation/project/paper/ report
[LOGMU2_W05] He has the knowledge to independently diagnose speech and feeding disorders in children with complex neurological disorders and genetic defects.	Has a structured theoretical knowledge of neurological therapy	[SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report	
Subject contents	<p>Selected specific issues of nervous system disorders and neuromuscular diseases - comprehensive rehabilitation, therapeutic methods used in the discussed disorders, the role of the speech therapist in comprehensive rehabilitation - part 2.</p> <p>Congenital malformations. Clinical manifestation of the most common congenital malformations of the musculoskeletal system. Neural tube defects - dysraphias, spinal cord injuries - clinical picture, complex rehabilitation, therapeutic methods used in the discussed disorders, the role of speech therapist in complex rehabilitation.</p> <p>Spinal pain syndromes-causes, symptoms, complex rehabilitation, therapeutic methods used in the discussed conditions, prevention. Principles of ergonomics in speech therapy practice (patient, therapist).</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	completion of the credit work and its presentation	51.0%	80.0%
	active attendance at lectures	80.0%	20.0%
