Subject objectives	The aim of the course is to develop the ability to critically self-evaluate one's own knowledge and skills and to enable continuous improvement, updating of knowledge and improvement of skills in the field of biotechnology, as well as to develop the ability to think and act entrepreneurially, especially useful in biotechnology. Students will have the opportunity to practice the ability to adapt to a changing environment combined with the acquisition of knowledge and skills, especially in a focused and independent manner.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[BIOTECHMU2_U08] The graduate is able to learn independently, effectively plan and organize work independently or as part of a team	The student independently carries out the professional practice according to the practice plan within the team to which he/she will be assigned.			[SU8] observation of student's independent or team work		
	[BIOTECHMU2_K07] The graduate is willing to think and act in an entrepreneurial manner.	A student choosing a place to carry out student internships improves his professional skills.			[SK6] demonstration of practical skills		
	[BIOTECHMU2_U06] The graduate is able to prepare, in a targeted manner in Polish and / or English, a written study, a scientific publication in the field of biotechnology using scientific language, including specialist terminology and conceptual apparatus	The student prepares a concise report on his/her professional practice including: information on the knowledge, skills or competencies acquired or developed and how the acquired competence can contribute to his (the student's) career development.			[SU2] presentation/project/paper/report		
	[BIOTECHMU2_K03] The graduate is willing to plan and organise his/her own work effectively, in particular laboratory work; plan an individual professional career	The student himself chooses the location of the internship (the base of biotechnology companies) in order to improve his skills acquired during his studies.			[SK5] implementation of a problem task		

Subject contents	Exercise methodology M1. Field exercises (professional practice in biotechnology enterprises):  Activities orienting the student's professional interests and increasing his/her competence regarding conscious self-education and the need for improvement.
