

Subject card

Subject name and code	Statistics with elements of mathematics in biological sciences, PG_00154231						
Field of study	Medical Biology						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	undergraduate studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		3.0		
Learning profile	academic		Assessment form				
Conducting unit	Pracownia Fizjologii Roślin i Toksykologii -> Katedra Biologii Eksperymentalnej i Biotechnologii Roślin -> Faculty of Biology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Agnieszka Baścik-Remisiewicz				
	Teachers		dr Agnieszka Baścik-Remisiewicz mgr Martyna Zalewska				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Additional information: solving tasks in groups or/and individual work						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		6.0		39.0	75
Subject objectives	1. To prepare students to use basic methods of statistical analysis and to apply them in the interpretation of biological phenomena and processes. 2. To acquaint students with the tools of mathematics necessary to understand the laws of nature and to describe life processes.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BIOLMEDL3_K01] understands the need for lifelong learning and to update his/her knowledge of medical biology and related disciplines	The graduate understands the need for lifelong learning and updating knowledge in medical biology, statistics and mathematics and related disciplines.	[SK8] observation of student's independent or team work
	[BIOLMEDL3_W08] identifies the tools of mathematics necessary to understand the laws of nature and to describe the processes of life	The graduate identifies the tools of mathematics necessary to understand the laws of nature and the description of life processes.	[SW4] test/exam - oral or written [SW5] implementation of a problem task
	[BIOLMEDL3_W13] presents the basic methods of statistical analysis and understands their importance in the interpretation of biological phenomena and processes	The graduate presents basic methods of statistical analysis and understands their importance in the interpretation of biological phenomena and processes.	[SW4] test/exam - oral or written [SW5] implementation of a problem task
	[BIOLMEDL3_U04] applies basic statistical methods and computer algorithms and techniques to describe phenomena and data analysis	The graduate is able to apply basic statistical and mathematical methods to description of phenomena and analysis of biological data.	[SU4] test/exam - oral or written [SU5] implementation of a problem task [SU8] observation of student's independent or team work
Subject contents	Examples of practical application of selected statistical and mathematical methods covered in the lecture topics. Statistics: basic concepts of statistics (types of variables, principles of number approximation). Descriptive statistics: sample size, arithmetic mean, variance, standard deviation, standard error. Binomial and normal distributions. Statistical hypothesis testing. Homogeneity of variance (Snedecor's F test). Student's t-test. One-way analysis of variance. Mathematics: Introduction to the calculus of probability. Number sequences. Derivative of a function and its application. Integral calculus of functions of one variable: the indeterminate and determinate integral, methods of calculating integrals and their application.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	statistics exam	51.0%	60.0%
	mathematics exam	51.0%	40.0%
Recommended reading	Basic literature	Baścik-Remisiewicz A., Chincinska I., Miklaszewska M. 2020. Wybrane zagadnienia ze statystyki i matematyki. Przewodnik do ćwiczeń dla studentów biologii. Wydawnictwo Uniwersytetu Gdańskiego Łomnicki A. 2014. (lub wydania wcześniejsze). Wprowadzenie do statystyki dla przyrodników. PWN, Warszawa. Krysicki W., Włodarski L. 2015. (lub wydania wcześniejsze). Analiza matematyczna w zadaniach. Część I i II. PWN, Warszawa.
