

Subject card

Subject name and code	General genetics with elements of conservation genetics, PG_00154329						
Field of study	Natural Resources Conservation						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	undergraduate studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit	Faculty of Biology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Anna Wysocka				
	Teachers		dr hab. Anna Wysocka				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		3.0		17.0	50
Subject objectives	Familiarization with the laws of heredity, mechanisms of gene functioning/cooperation, relationship of the genotype-phenotype. Familiarization with methods of determining the genetic structure, population potential and the impact of genetic variation on its level. Indication of genetic targets in the management of natural populations and in conservation activities. Presentation of modern research methods and development of the ability to ask questions, make assessments and solve uncomplicated genetic problems.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[OZPL3_W02] The graduate possesses advanced knowledge and understanding of the mechanisms governing the flow of genetic information, its regulation, the principles of inheritance, and the origins of variation in organisms		describes the mechanisms of the flow of genetic information, explains the rules of inheritance and the sources of variability of organisms		[SW4] test/exam - oral or written		
	[OZPL3_K08] The graduate is ready to systematically update his/ her natural knowledge and to apply it in practice		systematically updates natural knowledge and knows its practical applications		[SK8] observation of student's independent or team work		
	[OZPL3_U04] The graduate is able to plan and carry out simple research tasks in the biological sciences under the guidance of a supervisor		performs simple research tasks in the field of general genetics and conservation		[SU4] test/exam - oral or written		
	[OZPL3_K01] The graduate is ready to recognise the limitations in his/her own knowledge and understands the need for continuous learning and development		knows the limitations of their own knowledge and understands the need for continuous learning and development		[SK8] observation of student's independent or team work		

Subject contents	Mendelian inheritance with examples in plants, animals and humans. Inheritance inconsistent with Mendel's rules. Basic properties genes (penetrance, expressivity, pleiotropy, modification). Interaction of allelic and non-allelic genes. Lethal genes. Gender coupling. Recombination of genetic material; gene coupling. Multifactorial inheritance. Population genetic polymorphism and influencing factors changes in the frequency of alleles in populations. Genetic structure of the population.Genetic equalibrium. The relationship between loss of genetic variation and extinction. Genetic, demographic and environmental factors in biodiversity conservation. Gene flow between populations. Genetics and the future of endangered species. Units of protection: evolutionarily significant and management units. Reintroductions.								
Prerequisites and co-requisites									
Assessment methods and criteria	<table><tr><td>Subject passing criteria</td><td>Passing threshold</td><td>Percentage of the final grade</td></tr><tr><td>final test</td><td>51.0%</td><td>100.0%</td></tr></table>	Subject passing criteria	Passing threshold	Percentage of the final grade	final test	51.0%	100.0%		
Subject passing criteria	Passing threshold	Percentage of the final grade							
final test	51.0%	100.0%
