

Subject card

Subject name and code	Zoology of invertebrates - lecture, PG_00154381						
Field of study	Biology						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2024/2025		
Education level	undergraduate studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		3.0		
Learning profile	academic		Assessment form				
Conducting unit	Pracownia Entomologii Ewolucyjnej i Muzeum Inkluzji w Burszt -> Katedra Zoologii Bezkręgowców i Parazytologii -> Faculty of Biology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Jacek Szwedo				
	Teachers		dr hab. Jacek Szwedo				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		41.0	75
Subject objectives	1 To review the major types of invertebrate animals and Protista (Protozoa). 2. To understand the main mechanisms and trends in the evolution of the animals discussed. 3. To be able to recognise the main types of animals studied.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BIOLL3_U08] The graduate is able to learn independently, in a focused manner	- the individual in question is able to learn independently by preparing the issues that have been identified.	[SU4] test/exam - oral or written
	[BIOLL3_W03] The graduate knows the structure and functional relationships at the cellular, tissue, organ and organismal levels	- presents the structure of different types of invertebrates, taking into account functional relationships at the cellular (Protista), tissue, organ and organismal	[SW4] test/exam - oral or written
	[BIOLL3_K07] The graduate is prepared to apply the principles of bioethics consciously	- consciously apply the principles of bioethics	[SK1] oral statement/conversation/discussion
	[BIOLL3_W06] The graduate will know the characteristics, systematics and understand the evolution of selected groups of organisms including molecular basis and basic concepts and mechanisms of evolution	- presents the characteristics, systematics and evolution of selected groups of invertebrates	[SW4] test/exam - oral or written
	[BIOLL3_U07] The graduate should be able to independently search for and use available sources of biological information, including electronic sources	- independently finds and uses available sources of biological information, including electronic sources	[SU4] test/exam - oral or written
	[BIOLL3_U06] The graduate can read with comprehension simple scientific biological texts in Polish and simple texts in English	- independently finds and uses available sources of biological information in Polish and English, including electronic sources	[SU4] test/exam - oral or written
Subject contents	The role and tasks of systematics. Principles of modern zoological nomenclature. Basics of phenetic, cladistic and evolutionary systematics. Phylogeny, taxonomy, morphology, anatomy, bionomy and economic importance of selected protozoa and invertebrates belonging to all types (after echinoderms). Fossil record and evolutionary changes of invertebrates.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	written test	51.0%	100.0%
