|                                 | [BIOLL3_W13] The graduate knows and understands the principles of evaluating processes and phenomena using physical and/or chemical measurements                                                                                                                                                                                                                                                              | Student describes the basic methods of testing the properties of chemical substances                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | [SW4] test/exam - oral or written                                                 |
|                                 | [BIOLL3_K05] The graduate is prepared to take responsibility for their own and others' safety at work and to recognise risk situations and take appropriate action                                                                                                                                                                                                                                            | Student follows the rules of safe conduct in a chemical laboratory in such a way as not to pose a threat to one's own health, the health of others and the environment. Student uses the information contained in the Material Safety Data Sheets.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | [SK1] oral statement/conversation/discussion<br>[SK4] test/exam - oral or written |
|                                 | [BIOLL3_W09] The graduate knows the most important laws and rules of physics and chemistry underlying biological processes and the properties of chemical elements and compounds                                                                                                                                                                                                                              | Student defines the most important chemical laws and concepts governing phenomena occurring in nature. Student indicates the relationship between the structure of the atom and the properties of the element and its position in the periodic table. Student lists the most important types of chemical bonds. Describes the structure of gases, liquids and solids in terms of the kinetic-molecular model of matter. Student defines molar and percentage concentration. Student describes the most important aspects of energy, kinetics and equilibrium of reactions. Student describes the acid-base properties of aqueous solutions using the concept of pH. Student explains the basic concepts of oxidation-reduction reactions and electrochemical phenomena. | [SW4] test/exam - oral or written                                                 |
|                                 | [BIOLL3_K06] The graduate is prepared to take responsibility for the equipment/materials entrusted to them and for their own work and that of others                                                                                                                                                                                                                                                          | Student shows responsibility for the entrusted equipment and reagents, ensures cleanliness and order at the workplace. Student takes tests and colloquiums and submits reports within the prescribed deadlines.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | [SK1] oral statement/conversation/discussion<br>[SK4] test/exam - oral or written |
|                                 | [BIOLL3_U01] The graduate will be able to use basic apparatus and research tools and follow the correct sequence of operations in laboratory and field work                                                                                                                                                                                                                                                   | Student plans, performs and carries out research experiments, organizes and analyzes the experimental results, draws correct conclusions based on them, and presents the experimental results in writing. Student selects and uses laboratory equipment in accordance with its intended purpose. Conducts calculations using the known chemical laws.                                                                                                                                                                                                                                                                                                                                                                                                                   | [SU1] oral statement/conversation/discussion<br>[SU4] test/exam - oral or written |
| Subject contents                | Lecture: Atomistic structure of matter. Periodic table of elements. Chemical bonds. Kinetic-molecular models of states of matter. Solutions, solution concentrations. Energetic effects of chemical reactions. The speed of a chemical reaction. Equilibrium reactions. Acids and bases, pH concept, acid-base equilibria in aqueous solution. Oxidation and reduction reactions. Basics of electrochemistry. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                   |
