

Subject card

Subject name and code	Onto- and phylogenesis of nervous system, PG_00154594						
Field of study	Medical Biology						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2026/2027		
Education level	undergraduate studies		Subject group		Obligatory subject group in the field of study Optional subject group		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit	Pracownia Neurofizjologii i Neurochemii -> Katedra Fizjologii Zwierząt i Człowieka -> Faculty of Biology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Witold Żakowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	1. Students with familiarize the most important questions and mechanisms related to the ontogeny and phylogeny of the nervous system in animals. 2. Students will learn about the process of development of the nervous system in humans, in the pre- and postnatal period, as well as diseases/disorders related to this process. 3. Students will learn about the structure of the nervous system (including selected sense organs) in various systematic groups of invertebrates and vertebrates.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BIOLMEDL3_W06] describes, explains and compares systemic control mechanisms in animal and human organisms (including onto- and phylogenetic points of view) and the neurobiological and genetic basis of different disorders	describes and explains the basic stages and mechanisms of the development of the human nervous system in the embryonic and postnatal period, as well as diseases associated with disorders of this development	[SW4] test/exam - oral or written
	[BIOLMEDL3_U05] synthesises data from different sources and draws appropriate conclusions from them	synthesizes data from various sources and draws appropriate conclusions on this basis	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[BIOLMEDL3_U06] reads with understanding scientific texts in Polish and simple texts in English in the field of medical biology; independently searches and uses available sources of information, including electronic sources	reads with understanding scientific texts in Polish and simple texts in English in the field of evolution and ontogeny of the nervous system; independently searches for and uses available sources of information, including electronic sources	[SU2] presentation/project/paper/report [SU8] observation of student's independent or team work
	[BIOLMEDL3_U09] has the ability to give oral presentations in Polish or English on specific issues in medical biology	has the ability to deliver oral presentations in Polish on specific issues related to the evolution and ontogeny of the nervous system	[SU2] presentation/project/paper/report
	[BIOLMEDL3_U15] learns independently, in a focused manner	learns independently, in a directed way	[SU8] observation of student's independent or team work
	[BIOLMEDL3_K01] understands the need for lifelong learning and to update his/her knowledge of medical biology and related disciplines	understands the need for lifelong learning and updating knowledge about the evolution and ontogeny of the nervous system	[SK8] observation of student's independent or team work
	[BIOLMEDL3_W04] presents the characteristics, systematics and evolution of selected groups of organisms including molecular basis and describes the basic concepts and mechanisms of evolution	presents the characteristics of the nervous system in individual groups of organisms and describes the basic mechanisms of the evolution of the nervous system	[SW4] test/exam - oral or written
Subject contents	1. Characteristics of the onto- and phylogeny of nervous tissue and the nervous system. 2. Basic stages and processes of the nervous system development in the embryonic and postnatal period. 3. Evolution of the nervous system of animals. Review of the nervous systems of selected taxonomic groups of invertebrates and vertebrates.		
Prerequisites and co-requisites	Basic knowledge of zoology, animal anatomy, cell biology and mechanisms of evolution. Introductory classes/lectures: Neurophysiology, Basics of neuroanatomy		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	exam	51.0%	100.0%

	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	1. Subsequent stages of development of the nervous system. 2. Developmental diseases of the nervous system. 3. Features of the nervous system that determine the course of cognitive processes in selected groups of animals. 4. Evolutionary trends in the nervous system in various developmental lines.		
Work placement	Not applicable
