	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		0.0		10.0	25
Subject objectives	The aim of the course is to demonstrate the relevance of introducing the principles of social responsibility into socio-economic life by familiarising students with the sources of values and moral norms in contemporary ethical codes. This is to help students solve ethical dilemmas arising in social and professional life. Explaining the assumptions of the concept of sustainable development will make it possible to incorporate development principles into decision-making criteria and will indicate the necessity of sound research and will allow students to understand the the concept of socially responsible technology and innovation as well as the formation of good working relationships.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[ZISZL3_W04] The student has advanced knowledge of the organizational and legal forms of health care entities, knows and understands the relevant concepts of legal sciences, principles, norms and laws relating to health care activities.	Student has advanced knowledge of ethical norms and principles and related to the concept of social responsibility and sustainability concerning the functioning of organisations, including those in the health care sector.	[SW1] oral statement/conversation/discussion
	[ZISZL3_U03] The student takes into account in the decision-making process its legal, ethical, social, environmental and economic consequences, while taking into account the specificity of the functioning of medical entities and taking into account the welfare of the patient.	Student considers the ethical, social and environmental implications of business decisions.	[SU1] oral statement/conversation/discussion
	[ZISZL3_W06] The student knows to an advanced degree the relationships that occur between organizations (including forms of interaction with health care units) and between the organization and the human being, in particular medical personnel and the patient.	Student has advanced knowledge of the ethical, social and ecological dimensions of organisation-human relations and in inter-organisational relations and the accompanying challenges.	[SW1] oral statement/conversation/discussion [SW3] text preparation/written work
	[ZISZL3_K08] The student is ready to work in, contribute to and manage teams.	Student is able to collaborate in a group to prepare a written paper.	[SK3] text preparation/written work
Subject contents	Module 1: Social responsibility - assumptions, concept, sources. Module 2: Sustainability as a basis for social responsibility. Module 3: Responsibility of science and research.
