

Subject card

Subject name and code	Methodology of teaching children with mild intellectual disability in inclusive education, PG_00149979						
Field of study	Special Pedagogy						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	uniform Master's studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit	Division of Special Education -> Institute of Education -> Faculty of Social Sciences -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Marta Jurczyk				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	0.0	0.0	0.0	0.0	20
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		0.0		30.0	50
Subject objectives	The aim of the course is to provide material for understanding the specifics of learning of a student with mild intellectual disabilities in inclusive education; the specifics of school work with this student (with attention to the methodology of work at the first educational stage); to inspire students to search for ways of work; to form a reflective attitude towards educational activities with a student with mild intellectual disabilities in inclusive educationTranslated with DeepL.com (free version)						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[D.3.U.3] is able to motivate a child and student with special educational needs; develop their curiosity, activity and independence, support motivation to learn	is able to observe, recognize and explain teaching situations related to the process of educating people with special educational needs, is prepared to conduct teaching classes with students with mild intellectual disabilities in inclusive education	[SU4] test/exam - oral or written
	[D.3.W.7] Knows and understands the models of cooperation between teachers and specialists and its consequences for the organization of educational activities	Knows and understands the models of cooperation between teachers and specialists in inclusive education and their consequences for the organization of classes for students with mild intellectual disabilities	[SW4] test/exam - oral or written
	[D.3.W.2] Knows and understands the methodology of implementing open learning; models of individualized learning	knows and understands the specific functioning of people with mild disabilities, including students with special educational needs; knows their potential, needs and limitations in the field of inclusive education	[SW4] test/exam - oral or written
	[D.3.W.1] Knows and understands the essence and advantages of open learning in inclusive education; the specificity of working in a diverse group, the principles of designing the school classroom space; cognitive styles and learning strategies and teaching styles in the context of a heterogeneous group	knows and understands the methods of identifying, diagnosing and documenting (using information processing tools) the special educational needs of students with mild intellectual disabilities, taking into account the specificity of functional diagnosis	[SW4] test/exam - oral or written
Subject contents	A. Problems of the lecture:Diagnosis and programming of work: educational sensitivity of children with intellectual disabilities, as a premise for planning work; core curriculum in planning the work of students.Methodological solutions in individual educational areas: polonistic, mathematical and social-natural education. Factors determining the school success of a student with mild intellectual disabilities in learning Polish; factors determining the school success of a student with mild intellectual disabilities in learning mathematics. The core curriculum and the capabilities of the student; selected activating methods and the development of students' competencies; practical solutions for testing student achievement.Educational goals vs. solutions for working with a student with mild intellectual disabilities at the first educational stage (with the Method of Work Centers) and lesson work at the second and third educational stages.Student and teacher mistakes as a source of teacher reflection.		
Prerequisites and co-requisites	Course credit: Fundamentals of special pedagogy		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Written exam	51.0%	100.0%
