Subject objectives	The aim of the lecture is to provide the necessary knowledge enabling tax advisors and tax analysts to use tax analysis and tax planning skills in their work, in particular in the area of using legal and tax institutions to legally reduce tax burdens. During the lecture, students will learn about the issues of distinguishing between tax avoidance and tax evasion, aggressive and legal tax optimization, and tax planning. The reasons for the related phenomenon of tax competition, the challenges facing governments in a globalized economy, and the basic ethical issues associated with the topic will be outlined. Students will acquire skills in determining the boundaries between permissible forms of tax reduction and illegal tax avoidance, as well as in applying proven methods of reducing the level of taxes paid. They will also learn about the main restrictions in this area, including Polish European and international tax law institutions serving to limit tax optimization and counteract tax base erosion.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[PiDPMU2_WG01] has in-depth and structured knowledge of the basics of jurisprudence, public finances and private law, including the main development trends in legal sciences and economics and finance sciences		Knows the basic literature and set of related concepts, knows the main trends in the development of tax, financial, and accounting law in the field of counteracting tax optimization in recent years, and knows how to address them in contemporary scholarship		[SW1] oral statement/ conversation/discussion [SW3] text preparation/written work [SW5] implementation of a problem task
