Subject objectives	The aim of the course is to familiarize students with both fundamental and advanced issues in administrative property law, particularly with legal regulations concerning ownership and other property rights in the context of public administration activities. The course highlights the role of administrative bodies in processes related to land management, spatial planning and development, environmental protection, land administration, geodesy and cadastre, and public infrastructure. Students will develop the ability to analyze legal provisions, case law, and administrative documents, and will understand the significance of property law institutions for the functioning of public administration and the realization of the public interest.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[PAGMU2_UW01] The student is able to use his knowledge and sources of information, including advanced information and communication techniques and professional tools for acquiring information, to analyze and resolve complex problems, as well as to interpret legal, social, and political phenomena within the scope of the functioning of administration and the economy.	EK_03 – The student is able to use their knowledge and professional sources of information (including ICT tools and spatial information systems) to analyze legal problems related to real estate, infrastructure, and the environment in the context of public administration activities.	[SU1] oral statement/conversation/discussion [SU3] text preparation/written work [SU4] test/exam - oral or written [SU5] implementation of a problem task [SU8] observation of student's independent or team work
	[PAGMU2_WK04] At an advanced level, the student describes and understands the principles of the functioning of public authority bodies, administration, and economic entities, as well as identifies current dilemmas related to these issues.	EK_02 – The student possesses advanced knowledge of the principles governing the operation of public administration and its relations with economic and social entities in the areas regulated by administrative property law, and is able to identify current challenges and dilemmas in this field.	[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion [SW3] text preparation/written work [SW5] implementation of a problem task
	[PAGMU2_WG03] The student comprehensively recognizes and explains theories and methods related to the functioning and management of organizations, including those concerning human resource management, office administration, management accounting, as well as conducting negotiations and resolving disputes.	EK_04 – The student understands the importance of property law for effective administrative management and is ready to identify organizational and procedural issues in this area (e.g. in spatial planning, land use, or dispute resolution regarding property).	[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion [SW3] text preparation/written work [SW5] implementation of a problem task
	[PAGMU2_WG02] At an advanced level, the student knows and understands key regulatory issues related to the structure of the state, public administration, and the work of civil servants, as well as the legal and organizational conditions of selected areas of economic and social life.	EK_01 – The student has an in-depth knowledge and understanding of concepts, phenomena, and institutions related to the functioning of public administration in the field of property law, particularly in the areas of land management, spatial planning, expropriation, and environmental protection. EK_02 – The student possesses advanced knowledge of the principles governing the operation of public administration and its relations with economic and social entities in the areas regulated by administrative property law, and is able to identify current challenges and dilemmas in this field.	[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion [SW3] text preparation/written work [SW5] implementation of a problem task
	[PAGMU2_WG01] At an advanced level, the student identifies and understands the facts, phenomena, and their interactions related to the functioning of public authorities, administration, civil servants, the economy, and economic entities. He also knows the terminology, methods, and theories derived from legal sciences and related disciplines, relevant to issues concerning administration and the economy.	EK_01 – The student has an in-depth knowledge and understanding of concepts, phenomena, and institutions related to the functioning of public administration in the field of property law, particularly in the areas of land management, spatial planning, expropriation, and environmental protection.	[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion [SW3] text preparation/written work [SW5] implementation of a problem task

Subject contents	1. The concept and scope of administrative property law definitions, legal sources, and its place within the system of administrative law. 2. Public authority over real estate forms of administrative interference in property rights. 3.
