

Subject card

Subject name and code	Ballistics - lecture, PG_00133121						
Field of study	Criminology						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2026/2027		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit	Katedra Prawa Karnego Materialnego i Kryminologii -> Faculty of Law and Administration -> Rektor						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Adrian Wrocławski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	0.0	0.0	0.0	0.0	20
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		0.0		30.0	50
Subject objectives	Introduction to the legal and forensic issues of firearms and ammunition and the effects and traces of their use in the commission of crimes. To familiarise students with the possibility of using ballistics in evidence. To assimilate and make students understand general concepts related to firearms, ballistics and forensics. To know the basic legal regulations related to firearms and ammunition to be able to interpret and apply these regulations.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[KRYMMU2_WG02] Has an in-depth knowledge of the nature of natural sciences related to the studied major, their place in the system of sciences and their mutual relations		The student understands and can explain the relationship between natural sciences such as chemistry, physics and biology and ballistics, which is based primarily on empirical research		[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion		
	[KRYMMU2_WG05] Has an in-depth knowledge of methods and tools, including data and information extraction techniques, specific to criminology and forensic science		The student is familiar with methods and tools, including techniques for obtaining data and information, appropriate to the the studied field of study, with taking into account the specifics of criminology and forensic science		[SW4] test/exam - oral or written [SW1] oral statement/conversation/discussion		
	[KRYMMU2_KK01] Is aware of the level of his knowledge and skills, and understands the need for lifelong learning		The student is aware of the level of his knowledge and skills, understands the need for lifelong learning and is ready to continuously improve his knowledge. In particular, this is reflected in ballistics, which is based on the results of natural sciences.		[SK1] oral statement/conversation/discussion [SK4] test/exam - oral or written		

Subject contents	1. The concept of weapons and an outline of the history of their development 2. Forensic systematics of small arms 3. Construction of firearms 4. Ammunition and its classification 5. Ballistics (classical and chemical) 6. Forensic-weapons expertise (a) technical evaluation of firearms and ammunition (b) individual and group identification of firearms on the basis of traces left behind (c) determination of distance and direction of shots (d) identification of the shooter 7. Gunshot injuries 8. Securing firearms and ammunition and traces of their use for examination. 9. Firearms, bullets and shells casings files		
Prerequisites and co-requisites	No		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exam	51.0%	100.0%
