

Subject card

Subject name and code	Criminal Biology - lecture, PG_00134450						
Field of study	Biologia kryminalna - wykład						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		English		
Semester of study	1		ECTS credits		5.0		
Learning profile	academic		Assessment form		exam		
Conducting unit	Laboratory of Neurobiology -> Department of Animal and Human Physiology -> Faculty of Biology -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Wojciech Glac				
	Teachers		dr Wojciech Glac				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
	eNauczanie source addresses: Moodle ID: 13094 Criminal Biology 2025/2026 https://mdl.ug.edu.pl/course/view.php?id=13094						
	Additional information: Kurs prowadzony w systemie zgamifikowanym (o konstrukcji i działaniu opartych są na mechanice i elementach gry oraz fabule), w którym student_ka poprzez systematyczne wykonywanie różnego rodzaju zadań i uzyskiwanie w ich efekcie punktów, dokonuje postępu w grze, który zgodnie z podanymi kryteriami przekłada się jednocześnie na możliwość uzyskania określonej oceny końcowej (bez konieczności uczestniczenia w egzaminie bądź kolokwium). W przypadku kiedy ukończenie kursu oparte jest na wyniku egzaminu oraz udziału w dyskusjach, proporcje dotyczące składowej oceny końcowej ulegają zmianie na 20% - dyskusje oraz 80% - egzamin.						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		95.0	125
Subject objectives	• learning and understanding the neurobiological and social determinants of crime • learning and understanding the brain mechanisms underlying antisocial and criminal behavior • learning and understanding the mechanisms underlying the interactions between social and biological factors in their mutual influence on an individual's antisocial and criminal behavior						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[CCJL3_K02] is prepared to actively participate in groups, social or legal projects, organisations and institutions related to criminology in its broadest sense and to the administration of justice, while being able to communicate with both specialists and non-specialists in criminology	Is prepared to participate in various initiatives involving the application of knowledge and skills in criminal biology and to use this expertise professionally in communication within project teams.	[SK1] wypowiedź ustna/rozmowa/ dyskusja [SK5] realizacja zadania problemowego [SK8] obserwacja samodzielnej lub zespołowej pracy studenta
	[CCJL3_UW01] is able to use his knowledge of criminology and related scientific disciplines to formulate and interpret basic problems associated with criminology, as well as with the functioning of the national and international justice system, observes and interprets phenomena universal for different societies in the field of etiology and phenomenology of crime	Is able to apply knowledge of criminal biology to interpret the causes of criminal behavior and to assess an individual's vulnerability to criminal behavior based on their biological traits and social environment.	[SU1] wypowiedź ustna/rozmowa/ dyskusja [SU5] realizacja zadania problemowego
	[CCJL3_WG02] Has an enhanced knowledge of facts and concepts and the relationship between selected natural phenomena, social phenomena and in the sphere of the products of human thought, especially in the perspective of legal conditions related to the problems of criminal acts, as well as the etiology and phenomenology of crime, and on key social and psychological phenomena relevant in the context of the studied direction.	Demonstrates advanced knowledge of the interaction between biological and social factors in shaping vulnerability to antisocial and criminal behavior.	[SW4] test/egzamin - ustny lub pisemny [SW3] opracowanie tekstowe/ praca pisemna
	[CCJL3_WG05] has a basic knowledge of man, in particular, as a subject constituting social structures and the principles of their functioning, as well as a subject acting in these structures	Demonstrates knowledge of human neurobiology and the neurobiological basis of behavior, including social and antisocial behavior.	[SW4] test/egzamin - ustny lub pisemny [SW3] opracowanie tekstowe/ praca pisemna
Subject contents	- theories about the causes of crime - the role of genes and environment in the development of crime - human behavior and its regulation, emotions, motivation, drive reactions, free will, learning and conditioning - brain mechanisms influencing susceptibility to antisocial and criminal behavior and their inter-individual variability - brain mechanisms leading to antisocial and criminal behavior carried out in the so-called with passion and premeditation - the impact of mental disorders and personality disorders on the tendency to commit criminal behavior - biological differences between women and men and their impact on the tendency to engage in criminal behavior		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	discussions	51.0%	20.0%
	problem-based task	51.0%	25.0%
	elaborations	51.0%	30.0%
	quizzes	51.0%	25.0%
