

Subject card

Subject name and code	Fundamentals of human parasitology, PG_00154443						
Field of study	Biology						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		1.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Laboratory of Parasitology and General Zoology -> Katedra Zoologii Bezkręgowców i Parazytologii -> Faculty of Biology -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Leszek Rolbiecki				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		2.0		8.0	25
Subject objectives	1.Knowledge of parasites of greatest importance to humans. 2. To know the routes of infection and the principles of prevention of parasitic diseases.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BIOLL3_W14] The graduate knows the theoretical basis of experimental methods and the most important techniques of the biological sciences	Explains the theoretical basis of experimental methods and lists the most important techniques in parasitology, including parasitological diagnostics	[SW4] test/exam - oral or written
	[BIOLL3_W10] The graduate is familiar with the development and current state of knowledge and the latest trends in biology, as well as their relationship with other natural disciplines	is acquainted with the development and current state of knowledge and the latest trends in human parasitology and indicates their relationship with other natural disciplines	[SW4] test/exam - oral or written
	[BIOLL3_W04] The graduate is conversant with the course of physiological processes and their relationship to the adaptation of the organism to changing environmental conditions	Understands the functioning of the parasite-host system and the relationship to the adaptation of the of the parasite organism to changing environmental and host conditions (human)	[SW4] test/exam - oral or written
	[BIOLL3_U05] The graduate will be able to synthesise data from a variety of sources and draw appropriate conclusions	synthesizes parasitology data from various sources and draws adequate conclusions on this basis	[SU1] oral statement/conversation/discussion [SU4] test/exam - oral or written
	[BIOLL3_K05] The graduate is prepared to take responsibility for their own and others' safety at work and to recognise risk situations and take appropriate action	Is responsible for the safety of his own work and that of others, and is able to recognize parasitological risk situations and take appropriate actions	[SK1] oral statement/conversation/discussion
	[BIOLL3_K02] The graduate is prepared to critically self-assess their own competences and to update and improve their knowledge and skills	performs a critical self-assessment of his/her own competence and updates knowledge and improves skills in the field of parasitology	[SK1] oral statement/conversation/discussion [SK4] test/exam - oral or written
Subject contents	Definition and types of parasitism. Overview of selected groups of human parasites with consideration of their adaptations to parasitism. Parasitic diseases of man; pathways and factors that promote infection. Prevention of parasitic diseases.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	writing test	51.0%	100.0%
	attendance	80.0%	0.0%
