

Subject card

Subject name and code	Cell biology, PG_00154383						
Field of study	Biology						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit	Faculty of Biology -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. Małgorzata Kozieradzka-Kiszkurno				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	1. Introduction of the basic and most important issues in cell biology						
	2. Overview of cell organelles - structure and functions						
	3. Understanding basic issues regarding the structure and life cycle of a cell (cell division, growth and aging)						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BIOLL3_W14] The graduate knows the theoretical basis of experimental methods and the most important techniques of the biological sciences	- The graduate explains the theoretical basis of experimental methods used in laboratory classes and lists the most important techniques used in cell biology.	[SW4] test/exam - oral or written
	[BIOLL3_W03] The graduate knows the structure and functional relationships at the cellular, tissue, organ and organismal levels	- The graduate presents the structure of the cell and functional relationships at the cellular, tissue, organ and organismal levels.	[SW4] test/exam - oral or written
	[BIOLL3_W01] The graduate identify the constituent elements and explain the differences in the structure and function of prokaryotic and eukaryotic cells	- The graduate characterizes the basic components of a cell and explains the differences in the structure and functioning of prokaryotic and eukaryotic cells.	[SW4] test/exam - oral or written
	[BIOLL3_U02] The graduate will be able to make observations individually and in teams, and carry out basic physical, biological and chemical measurements in the field or laboratory	- The graduate can interpret cytological preparations.	[SU1] oral statement/conversation/discussion [SU4] test/exam - oral or written
	[BIOLL3_U01] The graduate will be able to use basic apparatus and research tools and follow the correct sequence of operations in laboratory and field work	- The graduate is aware of the use of basic research equipment and tools (light microscopes).	[SU1] oral statement/conversation/discussion [SU4] test/exam - oral or written
	[BIOLL3_K06] The graduate is prepared to take responsibility for the equipment/materials entrusted to them and for their own work and that of others	- The graduate is aware of responsibility for the entrusted equipment (microscopes) and his/her work and respects the work of others.	[SK8] observation of student's independent or team work
Subject contents	1. Cell evolution 2. Biological membranes; transport across membranes 3. Extracellular matrix of plant and animal cells 4. Cell organelles 5. Cytoskeleton 6. Cell growth and division 7. Aging and cell death		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Test	51.0%	100.0%
