

Subject card

Subject name and code	General chemistry, PG_00154386							
Field of study	Biology							
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026			
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study			
Mode of study	full-time studies		Mode of delivery		at the university			
Year of study	1		Language of instruction		Polish			
Semester of study	1		ECTS credits		3.0			
Learning profile	academic		Assessment form		credit			
Conducting unit	Faculty of Chemistry -> Rector							
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. Jolanta Kumirska					
	Teachers		dr Małgorzata Czaja					
			dr hab. Dawid Dębowski					
			dr hab. Aleksandra Dąbrowska					
			mgr Natalia Żukowska					
Lesson types	Lesson type		Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours		0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity		Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours		30		6.0		39.0	75
Subject objectives	Laboratory exercises: Experimental knowledge of selected properties of matter and the operation of the laws of chemistry. Developing the ability to plan, implement and draw conclusions from a scientific experiment. Acquiring the ability to use basic laboratory techniques and safe work with hazardous substances.							

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BIOLL3_W17] The graduate is familiar with the principles of safety and hygiene at work and with the principles of savoir-vivre in social and professional life	Student lists the principles of safe handling of hazardous substances. Student lists the most important elements of laboratory equipment and describes their applications for specific activities	[SW2] presentation/project/paper/report [SW3] text preparation/written work
	[BIOLL3_W13] The graduate knows and understands the principles of evaluating processes and phenomena using physical and/or chemical measurements	Student describes the basic methods of testing the properties of chemical substances.	[SW2] presentation/project/paper/report [SW3] text preparation/written work
	[BIOLL3_W09] The graduate knows the most important laws and rules of physics and chemistry underlying biological processes and the properties of chemical elements and compounds	Student defines the most important chemical laws and concepts governing phenomena occurring in nature. Student indicates the relationship between the structure of the atom and the properties of the element and its position in the periodic table. Student lists the most important types of chemical bonds. Describes the structure of gases, liquids and solids in terms of the kinetic-molecular model of matter. Student defines molar and percentage concentration. Student describes the most important aspects of energy, kinetics and equilibrium of reactions. Student describes the acid-base properties of aqueous solutions using the concept of pH. Student explains the basic concepts of oxidation-reduction reactions and electrochemical phenomena.	[SW2] presentation/project/paper/report [SW3] text preparation/written work
	[BIOLL3_U01] The graduate will be able to use basic apparatus and research tools and follow the correct sequence of operations in laboratory and field work	Student plans, performs and carries out research experiments, organizes and analyzes the experimental results, draws correct conclusions based on them, and presents the experimental results in writing. Student selects and uses laboratory equipment in accordance with its intended purpose. Conducts calculations using the known chemical laws.	[SU2] presentation/project/paper/report [SU3] text preparation/written work [SU8] observation of student's independent or team work
	[BIOLL3_K06] The graduate is prepared to take responsibility for the equipment/materials entrusted to them and for their own work and that of others	Student shows responsibility for the entrusted equipment and reagents, ensures cleanliness and order at the workplace. Student takes tests and colloquiums and submits reports within the prescribed deadlines.	[SK2] presentation/project/paper/report [SK3] text preparation/written work [SK8] observation of student's independent or team work
	[BIOLL3_K05] The graduate is prepared to take responsibility for their own and others' safety at work and to recognise risk situations and take appropriate action	Student follows the rules of safe conduct in a chemical laboratory in such a way as not to pose a threat to one's own health, the health of others and the environment. Student uses the information contained in the Material Safety Data Sheets.	[SK2] presentation/project/paper/report [SK3] text preparation/written work [SK8] observation of student's independent or team work
Subject contents	Laboratory exercises: Laboratory tasks related to the topic of the lecture.		
Prerequisites and co-requisites	lack		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	positive grades in all entrance written tests	51.0%	80.0%
	developing and presenting the results in writing and obtaining partial passes for all experimental tasks	51.0%	20.0%
	completing all exercises provided for in the study program	100.0%	0.0%
