

Subject card

Subject name and code	Plant physiology II, PG_00146069						
Field of study	Biology						
Date of commencement of studies	October 2025		Academic year of realisation of subject			2027/2028	
Education level	Bachelor's studies		Subject group			Obligatory subject group in the field of study Optional subject group	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	3		Language of instruction			Polish	
Semester of study	6		ECTS credits			1.0	
Learning profile	academic		Assessment form			credit	
Conducting unit	Department of Experimental Biology and Plant Biotechnology -> Faculty of Biology -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Wojciech Pokora				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		2.0		8.0	25
Subject objectives	To familiarise students with the current state of knowledge and the latest trends in plant physiology and its relationship to other disciplines natural sciences.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[BIOLL3_W04] The graduate is conversant with the course of physiological processes and their relationship to the adaptation of the organism to changing environmental conditions		absolenvt knows and understands the course of physiological processes and their relationship to the adaptation of the plant organism to changing environmental conditions			[SW4] test/exam - oral or written	
	[BIOLL3_W03] The graduate knows the structure and functional relationships at the cellular, tissue, organ and organismal levels		Graduates will know and understand the structure and functional relationships at a cellular, tissue, organ and organismal level			[SW4] test/exam - oral or written	
Subject contents	Photosynthesis: physiological and ecological aspects, physiological effects and adaptation to abiotic stresses, regulation of water and mineral transpiration minerals in the plant, induction and regulation of plant flowering, circadian rhythms, red light in the control of plant development, blue light in the control of morphogenesis and chloroplast movement, plant hormones: biosynthesis, degradation and signal transduction, ageing and plant death.						
Prerequisites and co-requisites	completed course in Plant Physiology						
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade	
	written exam		51.0%			100.0%
