| Subject objectives                          | <ol style="list-style-type: none"><li>1. Familiarization with the structure of mRNA and tRNA molecules, as well as the function of aminoacyl-tRNA synthetases and ribosomes.</li><li>2. To learn in detail the mechanisms of protein synthesis in prokaryotic and eukaryotic cells, and to discuss how this process is regulated at different stages.</li><li>3. To learn about the general issues of protein folding and degradation.</li><li>4. To be able to use available sources of biological information.</li></ol> |                                                          |                                         |                                     |                                                                                                                      |            |     |

|                   | [GBEL3_W03] The molecular mechanisms of genetic information transmission and gene expression, as well as the molecular and genetic basis of human physiology and diseases, including infectious diseases.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Knows the molecular mechanisms of expression of genetic information.                                                                                                                                                                                | [SW4] test/exam - oral or written<br>[SW1] oral statement/conversation/discussion |
|                   | [GBEL3_W06] the development and current state of knowledge, as well as the latest trends in molecular genetics and related fields; indicating their relationship with other disciplines in the natural or medical sciences and the possibilities of their practical application.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Is oriented to the current state of knowledge and the latest trends in molecular biology indicates their relationship with other disciplines of natural or medical sciences.                                                                        | [SW4] test/exam - oral or written<br>[SW1] oral statement/conversation/discussion |
|                   | [GBEL3_K02] Critical assessment of one's own knowledge and methods in the field of molecular biology and related disciplines, as well as the commercialization of research.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Is ready to critically evaluate his own knowledge and methods in the field of molecular biology.                                                                                                                                                    | [SK1] oral statement/conversation/discussion<br>[SK4] test/exam - oral or written |
|                   | [GBEL3_U04] Capable of reading scientific texts in English and Polish with comprehension, synthesizing the knowledge contained within them, preparing well-documented studies on biological issues, as well as those related to research commercialization.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Can read with understanding scientific texts in English and Polish, synthesizes the knowledge contained therein, prepares well-documented studies of biological problems concerning the process of translation, folding and properties of proteins. | [SU1] oral statement/conversation/discussion<br>[SU4] test/exam - oral or written |
|                   | [GBEL3_W01] Understanding the structure and properties of basic types of biological macromolecules, molecular mechanisms of metabolic pathways and genetic information flow, as well as sources of genetic variability in organisms and mechanisms of evolution; explaining the rules of inheritance, elucidating differences in the structure and functioning of prokaryotic and eukaryotic cells, and understanding the structure and functional relationships at the cellular and tissue levels.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Describes the structure and properties of the basic types of RNA, mechanisms of the translation process, explains the differences in the structure and functioning of the prokaryotic and eukaryotic cell.                                          | [SW4] test/exam - oral or written<br>[SW1] oral statement/conversation/discussion |
|                   | [GBEL3_K07] Lifelong learning and updating knowledge in the field of molecular genetics and other disciplines.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Understands the need for lifelong learning and updating knowledge of molecular biology.                                                                                                                                                             | [SK1] oral statement/conversation/discussion<br>[SK4] test/exam - oral or written |
|                   | [GBEL3_W05] the principles of research planning based on achievements in biological sciences and related fields, the potential application of their results in practice, the principles of operation of equipment and apparatus used in molecular genetics research, and the principle of interpreting biological phenomena and processes based on empirical data in research and practical activities, with consideration for sustainable use of biological diversity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Knows the principles of planning research based on the achievements of biological sciences related to the process of protein translation and the possibility of using their results in practice.                                                    | [SW4] test/exam - oral or written<br>[SW1] oral statement/conversation/discussion |
| Subject contents  | mRNA: differences in structure of prokaryotic and eukaryotic mRNA, structure of 5' and 3' ends of mRNA, stability and degradation of mRNA. tRNA: structure, modifications of bases in tRNA, maturation of tRNA, isoacceptor tRNA. Genetic code: historical outline, properties, principle of code vacillation, deviations from code universality. Aminoacyl-tRNA synthetases: structure, classification, mechanism of action. Ribosomes: structure of prokaryotic and eukaryotic ribosomes, arrangement of active sites, characteristics of rRNA. Regulation of gene expression at the level of the translational process. Translation initiation in prokaryotic and eukaryotic cells: stages of translation initiation process, role of initiation factors (IFs), structure and role of initiator tRNAs. Elongation of translation: role of elongation factors (EFs), stages of elongation process, effect of antibiotics that inhibit elongation, mechanism of peptide bond formation. Termination of translation: mechanism of termination, role of termination factors (RF). Mechanism of selenocysteine coding. Systems of mRNA quality control. Suppressor mutations: mechanism of suppression of missense nonsense and insertion mutations. Programmable shift of the mRNA reading frame. General principles of protein folding. Selected post-translational modifications of proteins. General issues of protein degradation. |                                                                                                                                                                                                                                                     |                                                                                   |

|                                                                |                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                               |
