

Subject card

Subject name and code	Instrumental analysis, PG_00054399						
Field of study	Chemistry						
Date of commencement of studies	October 2025		Academic year of realisation of subject			2025/2026	
Education level	Master's studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	1		Language of instruction			Polish	
Semester of study	1		ECTS credits			3.0	
Learning profile	academic		Assessment form				
Conducting unit	Department of Analytical Chemistry -> Faculty of Chemistry -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Grzegorz Romanowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		40.0	75
Subject objectives	familiarize students with the principles of electroanalytical, spectroscopic and chromatographic methods and stages of the analytical process, developing the ability to conduct basic analyses instrumental and their statistical evaluation, developing the ability to solve problems independently problems when conducting chemical analysis.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[CHEMMU2_W03] Demonstrates extended knowledge in the field of modern measuring techniques used in chemical analysis.	1. Selects an analytical method for a specific sample. 2. Explains the principles of sample preparation for analysis.	[SW2] presentation/project/paper/report [SW3] text preparation/written work
	[CHEMMU2_K01] Knows the limitations of her/his own knowledge; understands the need for further education and can inspire other people to do so.	1. Demonstrates an active attitude when faced with an analytical problem. 2. Demonstrates the ability to critically evaluate the analysis performed and the results obtained. 3. Takes care of the equipment used and the environment (disposal of chemical wastewater).	[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report
	[CHEMMU2_W07] Selects experimental and theoretical techniques to the extent necessary to understand the description and modelling of medium complexity chemical processes.	1. Explains and explains the principles of conducting analyzes using various instrumental techniques. 2. Recognizes the limitations of using each method.	[SW2] presentation/project/paper/report [SW3] text preparation/written work
	[CHEMMU2_U02] Critically assesses the results of conducted, performed observations and theoretical calculations and discusses errors.	1. Interprets the results in qualitative and quantitative terms, including their statistical processing. 2. Recognizes and operates the equipment used in the analytical laboratory.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report [SU3] text preparation/written work
	[CHEMMU2_W02] Has extended and in-depth knowledge in the field of basic chemistry.	1. Defines the basic laws in electroanalytical, spectroscopic and chromatographic methods. 2. Describes the structure and principles of operation of the equipment used in the above-mentioned methods.	[SW2] presentation/project/paper/report [SW3] text preparation/written work
	[CHEMMU2_W10] Uses knowledge of the principles of operation of the basic scientific and research apparatus used in chemistry.	1. Knows scientific and research equipment and knows what analytical tasks it can be used for. 2. Knows how it works and how to use it.	[SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report [SW3] text preparation/written work
	[CHEMMU2_U04] Applies acquired knowledge of chemistry and related scientific disciplines.	1. Uses basic formulas to calculate the amount of analyte. 2. Carry out the measurement in accordance with the instructions for the exercise.	[SU2] presentation/project/paper/report [SU3] text preparation/written work
	[CHEMMU2_W09] Classifies specialist IT tools used in statistical evaluation of experiment results.	1. Uses appropriate software for measurements and data processing. 2. Knows how to statistically evaluate experimental results.	[SW2] presentation/project/paper/report [SW3] text preparation/written work
Subject contents	Basics of laboratory work with equipment, performing chemical determinations and analyzes related to spectroscopic methods (UV-Vis spectroscopy), chromatographic methods (gas chromatography) and electroanalytical methods (potentiometry, conductometry, coulometry, polarography, voltammetry, amperometric titration).		
Prerequisites and co-requisites	knowledge of chemical methods of qualitative and quantitative analysis		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test	51.0%	65.0%
	report	51.0%	35.0%
Recommended reading	Basic literature W. Szczepaniak Metody instrumentalne w analizie chemicznej, PWN, WarszawaA. Cygański Metody spektroskopowe w chemii analitycznej, WNT, WarszawaA. Cygański Podstawy metod elektroanalitycznych, WNT, Warszawa
