

Subject card

Subject name and code	Environmental engineering, PG_00103521						
Field of study	Environmental Protection						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		1.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Laboratory of Photocatalysis -> Department of Environmental Technology -> Faculty of Chemistry -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Ewelina Grabowska-Musiał				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		2.0		8.0	25
Subject objectives	Introduce students with the basic technological processes used in water treatment -Introduce students with the basic processes of wastewater treatment and treatment of sewage sludge used in municipal wastewater treatment plants and in industrial plants and the devices corresponding to these processes. - Acquiring basic knowledge about the types and sources of air pollution and the principles of operation of waste gas purifying devices						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OŚL3_U02] Plans, selects appropriate research and measuring equipment and devices, performs physicochemical measurements and experiments; analyses the results and draws conclusions based on them.	plans, executes and interprets basic physical analyzes chemicals of water, sewage and sewage sludge	[SU1] oral statement/conversation/discussion [SU6] demonstration of practical skills [SU8] observation of student's independent or team work
	[OŚL3_U12] Uses environmental protection instruments, including the concept of sustainable development, in communicating with the socio-economic environment.	uses basic techniques analytical, binding acts legal in assessing the quality of the natural environment and the effectiveness of equipment used in water treatment and sewage treatment	[SU1] oral statement/conversation/discussion
	[OŚL3_W02] Characterises the relationships and relationships between various disciplines of natural sciences and science, uses knowledge of mathematics, physics, chemistry and biology in the description of basic concepts, concepts and principles in environmental protection.	explains the principles of selecting water, sewage and gas treatment technologies waste depending on the type of pollutants removed	[SW4] test/exam - oral or written [SW5] implementation of a problem task
	[OŚL3_K06] Knows and appreciates the practical application of the acquired knowledge and skills in solving problems.	explains the processes taking place in various elements of the environment after introducing contaminants into them	[SK5] implementation of a problem task
	[OŚL3_W11] Discusses measurement systems and analysis techniques used in monitoring the state of the natural environment.	characterizes and explains methods operation of the devices used in water treatment, wastewater treatment and waste gases	[SW1] oral statement/conversation/discussion
Subject contents	Solving accounting tasks		
Prerequisites and co-requisites	Prerequisites describing the course of natural and anthropopressory physical, chemical and biological processes occurring in the natural environment; application of basic methods and techniques of work in a chemical laboratory; defining and searching for applicable legal regulations and instruments of applying the law in environmental protection		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Auditorium exercises	51.0%	100.0%
Recommended reading	Basic literature	Grabowska-Musiał Ewelina., unpublished materials, made available to students during classes 1. Instructions for accounting exercises 2. Hermanowicz I., Dojlido J., Fizyczno-chemiczne badania wody i ścieków, Arkady, Warszawa 1999 3. A.L. Kowal, M. Świderska-Bróż, Oczyszczanie wody, Wydawnictwo Naukowe PWN, Warszawa 2009 4. Dymaczewski Z. (red), Poradnik eksploatatora oczyszczalni ścieków, PZliTS, Poznań 2011 5. Bartkiewicz B., Oczyszczanie ścieków przemysłowych, Wydawnictwo Naukowe PWN, Warszawa 2007 6.
