

Subject card

Subject name and code	Maritime economy, PG_00150431						
Field of study	Socio-economic geography with elements of GIS						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2026/2027		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study Humanistic-social subject group		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		5.0		
Learning profile	academic		Assessment form				
Conducting unit	Division of Regional Development -> Institute of Socio-Economic Geography and Spatial Management -> Faculty of Social Sciences -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Małgorzata Pacuk				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		75.0	140
Subject objectives	Systematise knowledge of the conditions, factors and patterns of transformation of the maritime economy and its various sections at different spatial scales						
	Acquisition of the ability to methodically analyse theoretical and practical maritime economy problems						
	Improving the ability to critically analyse information and one's own knowledge, as well as the ability to work in teams and collaborate with others						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GSEMU2_U02] properly select sources and information derived from them, with particular regard to sources of spatial information; evaluate them critically and interpret them creatively	identifies and selects sources of information on maritime economy in terms of their relevance and quality, as well as processes information obtained using qualitative and quantitative methods and then interprets them creatively	[SU2] presentation/project/paper/report [SU6] demonstration of practical skills
	[GSEMU2_W06] problems and theories in socio-economic geography, taking into account the complex relationships and trends of changes in the natural and anthropogenic environment; understands their theoretical and practical significance	describes the theories explaining the transformation of the maritime economy in the geographical and economic sciences, identifies the main problems of maritime economy development and explains their theoretical and practical significance	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
	[GSEMU2_K01] critically assess knowledge and received content in the field of socio-economic geography and Geographic Information Systems	interprets and verifies the knowledge and perceived content in the field of maritime economy	[SK2] presentation/project/paper/report [SK6] demonstration of practical skills
	[GSEMU2_K02] solve cognitive and practical problems in the field of socio-economic geography in cooperation with various entities, taking into account the acquired knowledge	solves cognitive and practical problems in the field of maritime economy taking into account the knowledge acquired and in cooperation with various entities	[SK2] presentation/project/paper/report [SK6] demonstration of practical skills
	[GSEMU2_U07] perform complex research tasks or expertise in the field of socio-economic geography by interacting with other people, taking a leading role in teams and present the results of these studies in a written and oral form using specialist terminology	designes complex research tasks in a group in the field of maritime affairs, consciously assuming a defined role and interacting with others, as well as presents research findings in written and oral form using specialist terminology	[SU2] presentation/project/paper/report [SU6] demonstration of practical skills
	[GSEMU2_W03] to a deeper extent the determinants (natural, social, economic, cultural) of processes occurring in the human life environment on various spatial and time scales	identifies the conditions and factors for transforming the maritime economy and understands their role on a global, baltic, national, regional and local scale, recognises the conditions and factors for transformation of individual sectors of the maritime economy and explains the interdependencies in their development	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
Subject contents	A. Problems of the lecture A1. The concept of maritime economy and its role in socio-economic development A2. Marine resources and their economic use (mineral resources, fisheries, aquaculture, offshore wind energy) A3. Maritime transport and seaports A4. Shipbuilding and offshore industry A5. Coastal, offshore and maritime tourism A6. Socio-economic and spatial policies towards maritime and coastal areas A7. Factors and barriers of maritime economy transformation B. Problems of exercises B1. Maritime economy in national and regional socio-economic and spatial planning documents B2. Issues of maritime economy in socio-economic and spatial planning of cities B3. Ports and shipyards - characteristics of economic activity and forms of spatial organisation B4. Coastal and maritime tourism - characteristics of economic activity and forms of spatial organisation		
Prerequisites and co-requisites	Knowledge from subjects taken in earlier semesters of this course is required		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	written test	51.0%	40.0%
	sub-tasts in class and own work	51.0%	60.0%
