| Subject objectives                          | The objective of this course is to introduce students aspects of private law in the context of the rapidly evolving digital economy. The lectures address legal challenges arising from the digitization of civil law relations, including electronic contract formation, data protection, civil liability in digital environments, and the legal framework governing digital platforms and online services. The course aims to develop students ability to analyze and interpret legal norms in the context of emerging technologies and to understand the impact of digitalization on private law institutions. |                                                          |                                         |                                     |                        |            |     |
