Subject objectives	The purpose of the course is to familiarize students with environmental administration as a complex process that includes both the actions of state and local government bodies that ensure environmental protection and rational management of environmental resources.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[ADMINL3_WK04] The student knows and understands the current dilemmas regarding the functioning of institutions of substantive and procedural law in the sphere of the state and administration. Additionally, he identifies key phenomena occurring in the market economy and economics, including knowledge and understanding of the basic principles of public finance, EU structural funds, the public procurement system, and the operation of various forms of entrepreneurship.	The student knows and understands the legal, economic, and organizational conditions of public administration in the field of environmental protection, including the principles of financing environmental tasks from public funds and EU funds, as well as the basics of public procurement procedures in this area.	[SW2] prezentacja/projekt/referat/raport
	[ADMINL3_UW01] Using his own knowledge and sources of information, including the ability to use modern digital techniques and professional methods of acquiring information, the student is able to analyze and resolve problems, as well as interpret legal, social, and political phenomena within the scope of administration and selected areas of social and economic life.	The student is able to use knowledge and modern digital techniques and professional methods of obtaining information to analyze and solve problems in the field of environmental administration and interpret legal, social, and economic phenomena related to environmental protection.	[SU5] realizacja zadania problemowego
	[ADMINL3_KO02] The student is aware of the necessity to take actions that protect the public interest, social interest, and legitimate individual interests of individuals.	The student is aware of the importance of protecting the public interest, social interests, and the legitimate interests of individuals in the process of making administrative decisions concerning the natural environment.	[SK1] wypowiedź ustna/rozmowa/dyskusja
	[ADMINL3_WG02] At an advanced level, the student is able to characterize the system of public authority (national, local, and EU-level), the structure of administration, the process of appointing bodies, their competencies, and the domains in which they operate, as well as the legal and organizational conditions for the functioning of administration.	Advanced students characterize the structure and competences of public administration bodies responsible for environmental protection at the national, local, and EU levels, taking into account their legal and organizational conditions.	[SW4] test/egzamin - ustny lub pisemny
