	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		34.0	50
Subject objectives	The aim of the course is to familiarise students with the basics of the methodology of speech and linguistic research, to develop their ability to build and organise their own research workshop, as well as their ability to use it in practice; to familiarise them with the typical working tools of speech therapists with an emphasis on comprehensive knowledge of information sources.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[LOGJ5_U03] He has the ability to interpret, analyze the causes and course of linguistic and communicative processes and phenomena, substantively argue using his own views and those of other authors, formulate conclusions and create synthetic summaries using the appropriate terminology of linguistics, sociolinguistics and ethnolinguistics and medical sciences relevant to speech therapy.	Is able to correctly analyse and interpret linguistic and language-related phenomena from a speech therapy point of view	[SU5] implementation of a problem task
	[LOGJ5_W01] Has a structured, in-depth and extended knowledge and knows at an extended level the terminology of linguistics and speech therapy (including selected terminology in a foreign modern language).	Knows basic and extended terminology in speech therapy research.	[SW1] oral statement/conversation/discussion [SW3] text preparation/written work
	[LOGJ5_U01] Able to distinguish methodological orientations in scientific research, search, analyze, evaluate, select and integrate information in the field of linguistics (including speech therapy) using various sources, selection and application of appropriate methods and tools, including advanced information and communication technologies (ICT) in order to formulate critical judgments on this basis, solve complex problems and carry out tasks in an innovative manner.	Is able to acquire and use theoretical knowledge, combining it with practical skills, independently plan and carry out specific speech therapy actions in the field of diagnosis, prevention and therapy of speech disorders, chooses and applies the appropriate method of treatment.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report
	[LOGJ5_U02] Independently plans and implements original and innovative linguistic and speech therapy projects, in accordance with the development trends of linguistics and speech therapy and related to the selected sphere of speech therapy activity.	Undertakes educational activities specific to speech therapy that meet the needs of the population group, such as lectures for teachers.	[SU1] oral statement/conversation/discussion [SU3] text preparation/written work
	[LOGJ5_W12] He knows and understands in depth the biomedical background of human development and communication skills, as well as their disorders, the structure and function of the human body, relevant to speech therapy and the changes in speech and language with age.	Understands the problems of language and speech disorders, their causes, resulting including those arising from bilingualism.	[SW1] oral statement/conversation/discussion [SW3] text preparation/written work
	[LOGJ5_K05] He is ready to build proper ties in the social environment and to initiate activities for the benefit of the social environment, prepared to responsibly perform the professional roles of a teacher and school speech therapist, including adherence to the principles of professional ethics and demanding this of others, as well as caring for the achievements and traditions of the profession.	Is prepared to fulfill the professional roles of teacher and school speech therapist in a responsible manner, adheres to the principles of professional ethics and requires others to do so, while caring for the achievements and traditions of the profession.	[SK8] observation of student's independent or team work
	[LOGJ5_W03] He knows the principles of speech therapy prevention and stimulation of normal speech and language development, as well as the theoretical basis of intervention activities for individuals and social groups in the scope necessary for the direction of speech therapy. He has knowledge of linguistics and speech therapy that allows him to independently program activities aimed at preventing speech disorders in individuals at risk of developing them.	Is familiar with the basic principles of speech therapy prevention and stimulation of correct speech development, as well as the principles of speech therapy in diagnosis and therapy.	[SW1] oral statement/conversation/discussion [SW3] text preparation/written work

Subject contents	Methodology for the development of systematic and logically consistent procedures for the acquisition of knowledge. Methods and procedures by which such knowledge is achieved, the concept of scientific method, application of research methodology in speech therapy. Bibliography as one of the basic sources of information - terminology, composition, basic issues of bibliographic description. Methods of collecting linguistic material from people with communication disorders; principles of analysis of the collected material (qualitative and quantitative analysis).		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	attendance in classes	80.0%	50.0%
	credit work	51.0%	50.0%
