

Subject card

Subject name and code	Coastal protection (Lecture), PG_00169061						
Field of study	Oceanography						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2024/2025		
Education level	undergraduate studies		Subject group		Obligatory subject group in the field of study Optional subject group		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Agnieszka Kubowicz				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Additional information: Lecture with multimedia presentation.						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		3.0		25.0	58
Subject objectives	Familiarization with the terminology of the coastal zone and methods of coastal protection.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANL3-U01] is able to use the applicable scientific terminology in the field of oceanography in various forms of expression	is able to use current scientific terminology in presenting and discussing problems in the field of coastal protection	[SU4] test/exam - oral or written
	[OCEANL3-W06] knows and understands, at an advanced level, the principles of management of the marine environment and its resources and the consequences of imbalances in marine ecosystems	knows and understands to an advanced degree the potential threats to the aquatic environment from strong anthropopression, especially in coastal regions of the seas and oceans	[SW4] test/exam - oral or written
	[OCEANL3-W01] knows and understands, at an advanced level, the terminology used in oceanography and related exact and natural sciences (in Polish and selected foreign language)	to an advanced degree, knows and understands the terminology relevant to coastal protection	[SW4] test/exam - oral or written
	[OCEANL3-U12] is able to systematically expand and update oceanographic knowledge and improve professional qualifications	is able to systematically expand and update knowledge in the field of coastal protection	[SU4] test/exam - oral or written
	[OCEANL3-U04] can independently search for information in Polish and foreign specialist literature, as well as on the Internet and databases	is able to individually search for information in the field of coastal protection issues in the Polish and English-language specialized literature, as well as in archival and electronic databases, performs a critical analysis and synthesis of information	[SU4] test/exam - oral or written
	[OCEANL3-W02] has an in-depth knowledge and understanding of physical, biological, chemical and geological processes and phenomena occurring in the aquatic environment, with particular emphasis on the marine environment	Knows and understands in broad terms the basic physical and geological processes and phenomena occurring in the coastal zone	[SW4] test/exam - oral or written
	[OCEANL3-W03] knows and understands, at an advanced level, the relationship between animate and inanimate elements of the aquatic environment, is aware of the complex nature of aquatic environments, their complexity and natural variability	knows and understands to an advanced degree the relationship between living and non-living components of the aquatic environment, is aware of the complex nature of the marine environment	[SW4] test/exam - oral or written
Subject contents	Coastal classification. Dynamics of the coastal zone. Methods of coastal protection. Anthropopression of coastal areas. Integrated management of the coastal zone. The state of coasts in Poland and methods of their protection. Protection of coasts in practice (case study).		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	final exam	51.0%	100.0%
Recommended reading	Basic literature	Basinski T., Pruszek Z., Tarnowska M., Zeidler R., 1993, Protection of seashores. Gdansk, Wyd. IBW PAN Dubrawski R., Zawadzka - Kahlau E., 2006, The future of the protection of Polish seashores. Zakład Wydawnictw Naukowych Instytutu Morskiego w Gdańsku. Zawadzka - Kahlau E., 1999, Tendencies of development of the Polish shores of the southern Baltic Sea. Gdańsk Scientific Society, Gdańsk.	
	Supplementary literature	Act of March 21, 1991 on maritime areas of the Republic of Poland and maritime administration. Dz.U. 1991.No. 32, item 131
