

Subject card

Subject name and code	Logistic Systems, PG_00169834						
Field of study	Economics						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study Optional subject group		
Mode of study	part-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Department of Logistics -> Faculty of Economics -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		mgr Patryk Wierzbowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	10.0	0.0	0.0	0.0	10
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	10		3.0		37.0	50
Subject objectives	The purpose of the course is to familiarize students with the concept of logistics systems. Make systematization of logistics systems, discuss the structure of logistics systems. Acquire students' skills in designing and optimizing goods and services, as well as logistics processes and systems, among others, using Design Thinking methodology and statistical methods, as well as IT tools, including ARIS Express. Strengthening students' social skills through group work.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[EKONL3_W03] has advanced knowledge of the relations between economic agents and social organisations operating in the national, international and intercultural arenas		The student understands the process and system approach to the functioning of any organization.		[SW2] presentation/project/paper/report		
	[EKONL3_K03] participates in the preparation of economic and social projects, being able to reconcile legal, economic, ecological, political and social requirements		The student undertakes assigned tasks and solves them creatively.		[SK2] presentation/project/paper/report [SK8] observation of student's independent or team work		
	[EKONL3_U02] is able to use the knowledge of theory and data to analyse concrete economic and social processes and phenomena and to analyse these phenomena using methods developed in economics, finance and management sciences		The student is able to use computer tools for mapping and describing the course of economic processes or systems.		[SU2] presentation/project/paper/report [SU8] observation of student's independent or team work		

Subject contents	1. Introduction to exercise issues		
	2. Design of a good or service according to elements of Design Thinking methodology (empathy, problem definition, idea generation, prototyping and testing)		
	3. Mapping of the basic and logistical process for the designed product using the ARIS Express tool		
	4. Designing a micrology system for an enterprise producing a good or providing a service		
	Any doubts regarding the issues discussed during classes can be discussed during consultations.		
Prerequisites and co-requisites	Ability to see economic events and processes in a systemic way.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Group presentation	51.0%	20.0%
	Group project	51.0%	80.0%
