

Subject card

Subject name and code	IT Systems in Logistics, PG_00169835						
Field of study	Economics						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study Optional subject group		
Mode of study	part-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		3.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Department of Logistics -> Faculty of Economics -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Beata Chmiel				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	20.0	0.0	0.0	0.0	20
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	20		7.0		48.0	75
Subject objectives	1. Introduction of students to the collection of integrated IT systems in logistics. 2. Introduction of students to the classification of tools used for resource planning in logistics: ERP, WMS, and BI classes. 3. Presentation of basic concepts in information logistics, including workflow and document circulation within an enterprise. 4. Preparing students to use advanced solutions in IT systems in logistics, especially global ERP systems, WMS systems, and the use of barcodes and RFID technology.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[EKONL3_K05] correctly identifies, diagnoses and resolves professional dilemmas and different options for solutions		The student can identify and resolve dilemmas related to the use of IT systems in the execution of logistics processes.		[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report [SK8] observation of student's independent or team work		
	[EKONL3_U03] is able to analyse the causes and course of specific economic and social processes and phenomena, and accurately analyse these phenomena using adequate methods and tools economic and social		The student is able to manage the information flow process, including documentation, using appropriate IT methods and tools. The student uses IT technologies to carry out logistics processes.		[SU2] presentation/project/paper/report [SU5] implementation of a problem task [SU8] observation of student's independent or team work		
	[EKONL3_W06] have an advanced knowledge of selected methods and tools, including statistical and econometric techniques, for describing economic agents and structures as well as social institutions and the processes taking place in them		The student has advanced knowledge of IT solutions that support the implementation of logistics processes in various types of organizations.		[SW4] test/exam - oral or written [SW2] presentation/project/paper/report		

Subject contents	1. Information system as a component of information systems. 2. Demand and supply of information in information systems. 3. Network technologies and telematics as the foundation of the Internet of Things in Industry 4.0. 4. Modeling IT structure and database structure using Aris software. 5. Introduction to the use of ERP-class IT tools in supply chains. Case study implementation in SAP ERP and ELSE.ERP programs. 6. Introduction to the use of WMS-class IT tools in various business organizations. Barcodes and RFID technology. Traceability in supply chains. Case study implementation in ELSE.WMS program.			
	Any doubts regarding the issues discussed during classes can be discussed during consultations.			
Prerequisites and co-requisites	Computer skills (Windows, MS Office), basic knowledge of English, ability to organize relationships between events and actions.			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade	
	Final test	51.0%	80.0%	
	Students' activity during classes	51.0%	20.0%
