Subject objectives	The aim of the course is to familiarize students with the basic aspects of the functioning of the European Union, both in the context of internal EU issues and its role in the international economy. In addition to general topics, particular emphasis is placed on the economic aspects, especially acquainting students with the fundamental mechanisms of the EU's internal market resulting from various stages of integration. This exploration reveals the effects on businesses, citizens, and economies of member states.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[EKONL3_U01] can correctly interpret economic and social phenomena and apply knowledge of economics, finance and management sciences to explain economic phenomena	The student can accurately identify the effects resulting from the integration of the European market in the context of global economic changes.
