

Subject card

Subject name and code	Multimodal Transport, PG_00170234						
Field of study	International Economic Relations						
Date of commencement of studies	October 2025		Academic year of realisation of subject			2026/2027	
Education level	Master's studies		Subject group			Obligatory subject group in the field of study	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	2		Language of instruction			Polish	
Semester of study	4		ECTS credits			2.0	
Learning profile	academic		Assessment form			credit	
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Ernest Czernański				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		12.0		23.0	50
Subject objectives	To familiarise students with the specifics of the functioning and organisation of multimodal supply chains, the transport and transshipment technologies used, and the calculation of door-to-door multi-modal transport costs.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[MSGMU2_W04] has an in-depth knowledge of different types and elements of economic structures and institutions, including institutions, organisations and economic entities; understands the causes, course, scale and consequences of changes occurring in them, as well as relations between them on a national, international and intercultural scale; knows the theories explaining relations among them	The student has in-depth knowledge of the various types and elements of multimodal transport systems, understands the causes, course, scale and consequences of changes occurring in them, as well as the interdependencies between them on a national, international and intercultural scale.	[SW2] presentation/project/paper/report
	[MSGMU2_U02] can observe, evaluate and critically analyse the causes and course of processes and phenomena taking place in the open economy; can formulate his/her own opinions on the subject, interpret statistical data and economic indicators necessary in this respect, and also forecast economic processes and phenomena using advanced methods and tools applied in economic sciences	The student is able to observe, evaluate and critically analyse the causes and course of processes and phenomena occurring in the multimodal transport sector, formulate their own opinions on the subject, interpret the necessary statistical data and economic indicators in this area, and forecast transport processes and phenomena using advanced methods and tools used in economic sciences.	[SU2] presentation/project/paper/report
	[MSGMU2_U04] can use the acquired knowledge to formulate and solve complex problems related to the operation of economic entities on the international market, with particular emphasis on the European Union market	The student is able to use their knowledge to formulate and solve complex problems related to the functioning of the freight transport system on the international market, with particular emphasis on the European Union market.	[SU2] presentation/project/paper/report
	[MSGMU2_U07] can plan and manage a commercial transaction on the international market, conduct effective negotiations, analyse and critically assess the course of the transaction	The student is able to plan a multimodal door-to-door supply chain and manage its implementation, conduct effective negotiations with suppliers of chain segment services, analyse and critically evaluate the chain's performance.	[SU2] presentation/project/paper/report
	[MSGMU2_U10] can accurately select and use sources of information on international economic relations, evaluate, critically analyse and creatively interpret them, and can present them in an innovative way, using advanced information and communication techniques	The student is able to select and use sources of information on multimodal transport appropriately, evaluate, critically analyse and creatively interpret them, and present them in an innovative way using advanced information and communication technologies.	[SU2] presentation/project/paper/report
	[MSGMU2_W13] knows and understands methods and tools for describing economic phenomena, including data acquisition techniques, which make it possible to describe and analyse economic entities functioning on the international market as well as processes and phenomena occurring in them and between them, and also those supporting decision-making processes	The student knows and understands the methods and tools for describing economic phenomena, including data collection techniques, allowing them to describe and analyse intermodal operators and the processes and phenomena occurring within and between them.	[SW2] presentation/project/paper/report
	[MSGMU2_W03] knows and understands types of economic ties and the regularities governing them; understands the conditions and principles of the functioning of the market and the market mechanism in the national, international and global aspect	The student knows and understands the types of economic and technological links between individual participants in a multimodal supply chain.	[SW2] presentation/project/paper/report
	[MSGMU2_U06] can identify types of risks related to international operations of enterprises and correctly determine their consequences and methods of mitigation, with a skilful application of theory, using appropriate research method	The student is able to identify the types of risk associated with the organisation of multimodal supply chains and correctly determine their consequences and methods of mitigation, skilfully applying theory and using the appropriate research method.	[SU2] presentation/project/paper/report

	Course outcome	Subject outcome	Method of verification
	[MSGMU2_K03] is ready to actively participate in groups, organisations and institutions conducting professional projects concerning the functioning of economic entities in the conditions of globalisation and the development of integration processes	The student is ready to actively participate in groups, organisations and institutions involved in professional multimodal freight transport in the context of globalisation and the development of integration processes in transport.	[SK2] presentation/project/paper/report
	[MSGMU2_U03] can identify and analyse relations between business entities and institutions in their national and international environment	The student is able to identify and analyse the relationships between participants in multimodal supply chains in their national and international environment.	[SU2] presentation/project/paper/report
	[MSGMU2_W02] knows an advanced terminology in the field of international economics, international economic relations and complementary disciplines	The student is familiar with advanced terminology in the field of multimodal transport.	[SW2] presentation/project/paper/report
	[MSGMU2_W05] has an in-depth knowledge of the world economy, principles of global market functioning and international financial relations as well as the process of their evolution; understands the causes, regularities and consequences of occurring changes	The student has in-depth knowledge of the transport system, the principles of the multimodal transport services market and the process of its evolution, and understands the causes, patterns and consequences of the changes taking place.	[SW2] presentation/project/paper/report
	[MSGMU2_W09] has an in-depth knowledge of selected areas of the functioning of a modern enterprise in the national and international environment; understands the conditions, principles and consequences of decisions taken in its structures aiming at the development, and the dependencies among enterprises on the international market	The student has knowledge of: the functioning of multimodal/intermodal operators, knows the specifics of the functioning of this type of entity, their scope of activity and responsibilities.	[SW2] presentation/project/paper/report
	[MSGMU2_K06] is ready to independently identify, diagnose and responsibly resolve dilemmas and alternative solutions related to his/her profession and the development of professional achievements	The student is ready to independently identify, diagnose and responsibly resolve dilemmas and various solution options related to the planning and implementation of multimodal freight transport.	[SK2] presentation/project/paper/report
Subject contents	Introductory issues. Organisational matters. Container construction and types examples. Container design (examples). Container marking examples. Rules for container placement and securing examples. Terminals and container handling examples. Special cargo composition examples. Organisation of container transport (tasks and examples). Transport and transshipment technologies examples. Transport services and their documentation examples. Management of other types of intermodal loading units (swap bodies, semi-trailers and road trains). C 1 Multimodal transport involving sea and inland waterways C 2 Transport and transshipment technologies in multimodal transport C 3 Integrated loading units used in intermodal transport C 4 Transport and transshipment technologies in intermodal transport C 5 Assessment of the state of intermodal transport in Poland		
Prerequisites and co-requisites	transport economics, international economic relations		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		51.0%	100.0%
