

Subject card

Subject name and code	Sustainable Urban Mobility, PG_00171495						
Field of study	Economics						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2026/2027		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study Specialty subject group		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Department of Transport Market -> Faculty of Economics -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Marcin Wolek				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		10.0		25.0	50
Subject objectives	To familiarize the student with the concept of sustainable mobility. Indication of the connections between spatial planning and transport. Presentation of the sustainable mobility planning process along with selected analytical methods. Presenting to the Student how to monitor the mobility plan.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[EKONMU2_U06] can practically apply various forms and range of acquired knowledge in economics, finance and management, supplementing it with an independent critical analysis of its efficiency and usefulness	The student can assess the most important elements of the sustainable mobility planning process.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report
	[EKONMU2_W03] has an in-depth knowledge of relations between economic phenomena, entities and organisations as well as public institutions functioning in the national, international and intercultural spheres	The student can identify the most important connections and stakeholders necessary for planning sustainable mobility.	[SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report
	[EKONMU2_W07] has an in-depth knowledge of economic and financial principles governing the functioning and management of economic entities and organisations, as well as of systems of legal, organisational, professional, moral and ethical norms and rules organising public structures and institutions, both in the national and international spheres	The student can use interdisciplinary knowledge to interpret complex social, economic, and spatial phenomena that are analysed in the process of planning sustainable mobility.	[SW1] oral statement/conversation/discussion
	[EKONMU2_K03] inspires and organises preparation of economic and social projects, following the idea of sustainable development, reconciling legal, economic, ecological, political and social requirements	The student can prepare a project based on economic theories relating to sustainable development.	[SK1] oral statement/conversation/discussion [SK2] presentation/project/paper/report
	[EKONMU2_U08] can independently analyse economic and social phenomena and processes, and can perform a theoretically deepened assessment of such phenomena, using appropriately selected research method	The student can assess the most important elements of the sustainable mobility planning process.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report
	[EKONMU2_K04] is ready to think and act in an entrepreneurial manner; adapts to new situations and conditions; undertakes challenges of creative thinking; acquires resilience to failures; can assess risks and threats and find ways of counteracting their effects	The student has the ability to critically analyze strategic documents referring to sustainable mobility using economic instruments.	[SK2] presentation/project/paper/report [SK5] implementation of a problem task [SK8] observation of student's independent or team work

Subject contents	Sustainable mobility as a response to global challenges 1.1. Environmental reasons for planning sustainable mobility 1.2. Spatial structures and transport 1.3. EU legal framework 2. Case study: Sustainable urban mobility planning process 2.1. Identification and diagnosis of stakeholders 2.2. Development of scenarios 2.3. Vision, goals, action plan and monitoring 3. Active mobility in planning sustainable mobility 3.1. Pedestrian traffic 3.2. Cycling traffic 3.3. Active mobility in mobility chains 4. Car in the city 4.1. Traffic optimization 4.2. City logistics and freight transport 4.3. Reducing the impact of motoring on the environment 5. Public transport - the basis of sustainable urban mobility 5.1. Public transport and urban development 5.2. Public transport means and their features 5.3. New trends in the development of public transport 6. Selected methods for analyzing sustainable mobility 6.1. Environmental approach 6.2. Spatial approach 6.3. Economic and social approach 7. Sustainable mobility in a global context Any doubts regarding the issues discussed can be clarified during the consultations.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Student's activity	51.0%	15.0%
	The project	51.0%	60.0%
	Attendance rate	51.0%	25.0%
