

Subject card

Subject name and code	Functioning and Development of Sea Ports in the World, PG_00172268						
Field of study	International Economic Relations						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study		
Mode of study	part-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit	Department of Maritime Transport and Seaborne Trade -> Faculty of Economics -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Janusz Dąbrowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	6.0	0.0	0.0	0.0	6
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	6		2.0		42.0	50
Subject objectives	To familiarize students with the specificity of seaports as complex and important economic entities, their equipment, scope of activity, production process, services provided, management methods and directions of their development in the world.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[MSG3_U13] can prepare presentations and oral speeches on selected specific problems concerning international economic relations (in connection with the chosen speciality within International Economic Relations), using basic theoretical approaches, specialist terminology, principles of collecting data from various sources, their description and interpretation, and drawing conclusions based on scientific literature		The student has the ability to prepare a presentation using various data sources (Polish and foreign), specialized terminology, and is able to describe and interpret socio-economic phenomena related to port activities. The student discusses the presentation plan during consultations with the lecturer.		[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report		
	[MSG3_W13] has a well-structured knowledge of the functioning of business entities in the national and international environment, with particular emphasis on the European Union		The student understands the role and importance of seaports as elements of state infrastructure, transport hubs and links in transport chains. The student knows the systems and models of seaport management in the world, understands the mechanism of operation of seaports, lists and characterizes contemporary directions of development of seaports.		[SW2] presentation/project/paper/report		

Subject contents	Basic measures of the size and importance of seaports (quantitative measures of cargo handling, quantitative and qualitative measures of ship handling, quantitative and qualitative measures of land transport services, measures determining the size and quality of the port's production potential, measures determining the port's position on the port services market, economic measures of activity port on the example of seaports in Europe, America, Asia, Africa and Australia). Organization of seaport management in the world (systems and models of seaport management in the European Union, seaport management methods in selected countries around the world, seaport management systems in Poland). Directions of seaport development (generations of seaports, containerization in seaports, seaports as logistics centers, sustainable development of seaports, organization and functioning of port clusters, role and functions of dry ports in the transport system).		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Multimedia presentation	51.0%	100.0%
